Frontotemporal Dementias May 03 2023 Under the name of Frontotemporal Dementias (FTD) numerous hereditary and sporadic disorders are listed. FTD may take away speech and language, social skills and ethical judgement, wishes and will, empathy and emotions; it may also impair motor functions. FTD may affect men and women in midlife or during old age leading to the demolition of the uniqueness of the human mind. In the last decade of the 20th century and in the first two decades of the 21st century, progress in the understanding of clinical, neuropathological, biochemical, and genetic aspects of FTD has accelerated. The novel awareness about FTD has directed young generations of researchers toward the study of this complex group of disorders. This Volume has been formulated with the participation of some of the leading scientists who have contributed to the development of knowledge in the clinical and basic science arenas. It captures the current central elements that are relevant to an up-to-date understanding of causes and pathogenesis of multiple forms of FTD. The volume is an opus that represents a distillation of the work of many scientists and addresses the current directions in the study of one of the most complex groups of diseases. In view of its structure, the book could also be used as a textbook, that offers both a broad and deep analysis of major areas in FTD. This book, planned by the International Society for Frontotemporal Dementias, is distinctive as it opens a window to a wide landscape about the biology of FTD. Thus, the book represents a moment of reflection on the present state of our knowledge of FTD and a collective vision toward scientific progress. The authors of each chapter share their knowledge and vision aimed at reducing the suffering which is caused by FTD.

SAS Survival Handbook, Revised Edition Jan 19 2022 For Any Climate, in Any Situation Newly updated to reflect the latest in survival knowledge and technology, the internationally bestselling SAS Survival Handbook is the definitive resource for all campers, hikers, and outdoor adventurers. From basic campcraft and navigation to fear management and strategies for coping with any type of disaster, this complete course includes: Being prepared: Understanding basic survival needs and preparing essentials, such as a pocket survival kit. Making camp: Finding the best location, constructing the appropriate shelter, organizing camp, and creating tools. Food: What to eat, what to avoid, where to find it, and how to prepare it. First aid: A comprehensive course in emergency/wilderness medicine, including how to maximize survival in any climate or when injured. Disaster survival: How to react in the face of increasingly frequent natural disasters and hostile situations—and how to survive at home if all services and supplies are cut off.

Assessing Competencies for Social and Emotional Learning Apr 02 2023 Assessing Competencies for Social and Emotional Learning explores the conceptualization, development, and application of assessments

of competencies and contextual factors related to social and emotional learning (SEL). As programs designed to teach students social and emotional competencies are being adopted at an ever-increasing rate, new measurements are needed to understand their impact on student attitudes, behaviors, and academic performance. This book integrates standards of fairness, reliability, and validity, and lessons learned from personality and attitude assessment to facilitate the principled development and use of SEL assessments. Education professionals, assessment developers, and researchers will be better prepared to systematically develop and evaluate measures of social and emotional competencies.

Een kind met mogelijkheden Dec 30 2022 Door de jaren heen zijn moeilijk lerende kinderen, zwakbegaafde kinderen of licht verstandelijk gehandicapte kinderen door de maatschappij en de zorg gedefinieerd op basis van negatieve kenmerken. In dit boek voert neuropsycholoog Albert Ponsioen een

warm pleidooi voor meer maatwerk in de zorg, waarbij er wordt gekeken naar zowel de sterke als de zwakke vaardigheden van deze groep bijzondere kinderen. In het eerste deel van *Een kind met mogelijkheden* wordt ingegaan op de gangbare manier van kijken naar deze groep. Zo komen de pogingen aan bod om de problematiek van deze kinderen in definities en beschrijvingen te vangen. In het tweede deel wordt met andere ogen naar deze groep kinderen gekeken. Er worden suggesties gedaan om hun problematiek beter in beeld te brengen; beter weten wat een kind wel en niet kan maakt het mogelijk om de begeleiding en behandeling beter op maat te krijgen. Het boek wordt afgesloten met handige adressen en websites. In dit boek komt naast Ponsioen Daan Pellini aan het woord. Daan woont en werkt al meer dan 10 jaar begeleid zelfstandig in Amsterdam. Als ervaringsdeskundige illustreert hij het pleidooi van Ponsioen met concrete voorbeelden. Samen vertegenwoordigen zij de beide kanten van de zorg: hulpvrager en hulpbieder. *Een kind met mogelijkheden* is geschreven voor iedereen die persoonlijk of beroepsmatig te maken heeft met kinderen die licht verstandelijk gehandicapt zijn: professionals binnen onderwijsbegeleidingsdiensten, de LVG-zorg, orthopedagogische behandelcentra en de jeugdhulpverlening, ouders en leerkrachten.

SIVT Sociale informatieverwerkingstest Oct 28 2022 "De SIVT is een unieke test waarmee de sterke en zwakke aspecten van de sociale informatieverwerking in kaart worden gebracht. De SIVT is in te zetten bij kinderen en jongeren met externaliserende gedragsproblemen of andere problemen waarbij de verwerking van sociale informatie een rol kan spelen. Wat de SIVT uniek maakt is dat hij ook geschikt is voor kinderen en jongeren met een LVB. De SIVT is een interactieve, digitale test en heeft twee verschillende versies: een versie voor kinderen (8-12 jaar) en een versie voor jongeren (13-17 jaar). De test wordt afgenomen met een

tablet of laptop en bestaat uit filmpjes van sociale probleemsituaties waarover het kind vragen beantwoordt. De sociale probleemsituaties in de filmpjes zijn realistisch en relevant voor de leeftijdsgroepen." --
