Abstract: A comprehensive training manual is designed for sanitarians, sanitary engineers, and administrative personnel responsible for food protection programs in food service operations in industry and government. Topics include: the current status of foodborne disease problems; the fundamentals of microbiology in food processing; protocols for food sampling for analysis; information and guidelines concerning mechanical dishwashing, cleaning and sanitizing operations, the cleaning of multi-use utensils and food equipment surfaces, and the sanitary design, installation, and evaluation of food service equipment; methods for inservice education of food service workers; food surveillance and salvage following disasters; plumbing hazards; insect and rodent control and proper pesticide applications; the measurement and control of product temperature in food service; and the food service manager training and certification program. Standardized procedures for investigating foodborne illness are presented, and a

sample food service establishment inspection report is appended. Numerous charts, graphs, and illustrations are included throughout the text. The Washington Manual of Critical Care, similar to other volumes in this vaunted series, features authors and contributors who are faculty members and practicing physicians at Washington University's School of Medicine. Inside you'll find comprehensive and current information for bedside diagnosis and management of some of the most common illnesses and problems encountered in the ICU setting. The South Asian Edition of The Washington Manual of Critical Care provides a multidisciplinary, clinically oriented approach to the management of patients in critical care. The book discusses the complete range of critical care subspecialties, including cardiology, pulmonology, gastroenterology, neurology, toxicology, nephrology, infectious disease, various procedures, and much more. This will serve as a bedside quick reference guide to the intensive care physicians. Tables and illustrations help provide a quick and easy bedside reference and give a practical approach to the management of these patients. Readers will find comprehensive and current information for the diagnosis and management of some of the most common illnesses and problems encountered in the critical care setting. This book will be very helpful for the preparation of various critical care exit examinations in the country and abroad. Key Features: Addition of 2 new chapters relevant to South Asia and Indian subcontinent; Tropical fever in ICU, and Extracorporeal therapy in ICU. Extensive coverage of neuro critical care disorders, sepsis, shock, and infectious diseases in terms of updated guidelines, common drugs used, and the latest antibiotic policies in the Indian subcontinent. In the Toxicology section addition of organophosphate poisoning and anti-snake venom (ASV). Provides overviews of various procedures performed, and the physiological and pharmacological aspects of critical care. Includes concise, easy-to-read diagnosis and treatment algorithms for common conditions, and bibliographical references for additional, in-depth reading.
