[The Myth of Homeland Security](#) Nov 30 2020 "As I write this, I'm sitting in a restaurant in a major U.S. airport, eating my breakfast with a plastic knife and fork. I worked up quite an appetite getting here two hours early and shuffling in the block-long lines until I got to the security checkpoint where I could take off my shoes, remove my belt, and put my carry-on luggage through the screening system . "What's going on?"

It's homeland security. Welcome to the new age of knee-jerk security at any price. Well, I've paid, and you've paid, and we'll all keep paying-but is it going to help? Have we embarked on a massive multibillion-dollar boondoggle that's going to do nothing more than make us feel more secure? Are we paying nosebleed prices for "feel-good" measures? . "This book was painful to write. By nature, I am a problem solver. Professionally I have made my career out of solving complex problems efficiently by trying to find the right place to push hard and make a difference. Researching the Department of Homeland Security, the FBI, CIA, INS, the PATRIOT Act, and so forth, one falls into a rabbit's hole of interdependent lameness and dysfunction. I came face to face with the realization that there are gigantic bureaucracies that exist primarily for the sole purpose of prolonging their existence, that the very structure of bureaucracy rewards inefficiency and encourages territorialism and turf warfare."

Writing Information Security Policies Dec 12 2021 Administrators, more technically savvy than their managers, have started to secure the networks in a way they see as appropriate. When management catches up to the notion that security is important, system administrators have already altered the goals and business practices. Although they may be grateful to these people for keeping the network secure, their efforts do not account for all assets and business requirements Finally, someone decides it is time to write a security policy. Management is told of the necessity of the policy document, and they support its development. A manager or administrator is assigned to the task and told to come up with something, and fast! Once security policies are written, they must be treated as living documents. As technology and business requirements change, the policy must be updated to reflect the new environment--at least one review per year. Additionally, policies must include provisions for security awareness and enforcement while not impeding corporate goals. This book serves as a guide to writing and maintaining these all-important security policies.
