Editors Jelalian and Steele have ensured that the chapters utilize the most up-to-date empirical and clinical knowledge available. This volume provides readers not only raw data, but also a framework for translating findings into effective, efficient practice - assessment, treatment, and prevention. It will be required reading for a host of professionals, from psychologists to social workers and medical practitioners. Thoroughly revised and updated for its Fourth Edition, this Spiral® Manual is a practical quick-reference guide to the diagnosis and management of all gastrointestinal problems—from common complaints such as intestinal gas to life-threatening diseases such as cancer and AIDS. Chapters written in an easy-to-scan outline format cover the approach to the

patient, diagnostic and therapeutic procedures, nutritional assessment and management, gastroenterologic emergencies, and specific complaints and disorders. Highlights of this Fourth Edition include an expanded obesity chapter, major updates on inflammatory bowel disease and irritable bowel syndrome, new treatments for viral hepatitis, and endoscopic treatment of gastroesophageal reflux disease. The Construction Manuals from Edition Detail are among the most important reference works in the specialist literature. The latest volume shows the potential of the material concrete and documents comprehensively the technical principles of using concrete in construction. Chapters cover the history of the material, the properties of concrete, reinforced concrete, and prestressed concrete, the treatment of its surface. Also covered are the basic principles of statics for large and small structures, and the building requirements with respect to heat, damp, sound-proofing and fire protection according to the most recent norms and standards. Finally a large number of built examples are presented from illustrations of the complete structure down to detailed plans, showing the broad spectrum of applications for concrete in contemporary building. All plans have been specially produced by the editorial department Detail for this book and for ease of comparison, they have been drawn to the same scale. This highly illustrated manual provides practical guidance on structural steelwork detailing. It: describes the common structural shapes in use and how they are joined to form members and complete structures explains detailing practice and conventions provides detailing data for standard sections, bolts and welds emphasises the importance of tolerances in order to achieve proper site fit-up discusses the important link between good detailing and construction costs Examples of structures include single and multi-storey buildings, towers and bridges. The detailing shown will be suitable in principle for fabrication and erection in many countries, and the sizes shown will act as a guide to preliminary design. The second edition has been updated to take account of changes to standards, including the revisions to BS5950 and includes a new chapter on computer aided detailing.
