The studies for viola by Franz Anton Hoffmeister (1754-1812) can be considered as one of the most important works written for viola players in this period nearly to the 19th century. This urtext edition is made from a complicated source, it is a facsimile of the first edition of the twelve studies that are divided into two books, therefore, this version tries to get as close as possible to the real intentions of Hoffmeister to provide interpretation opportunities to both professional and amateur musicians in a clear and spacious manner, also presents a musical text that is not limited by the philosophy of over-publishing of the 19th century. Convenient page turns for individual study and some parenthetical suggestions for slurs, dynamics and tempo have been offered by the editor. Classical/Opera Piano Solos A comprehensive guide to the historical, analytical and interpretative issues surrounding one of the major genres of Western music. Translated from the French by Florence W. Seder, Dimitry Markevitch concludes his preface, or Prelude as he calls it: "History, fact and personal anecdote blend here to provide a complete story of the instrument. May this book entertain you, help you to know the cello to the fullest, and lead you to love it as I do." Reading the book confirms that he has amply accomplished his aims. His qualifications for doing so are of the highest. Markevitch is a performer of considerable note and a teacher at both the Ecole Normale de Musique and Conservatoire Serge Rachmaninoff in Paris. He also has a keen interest in musicology and has edited many works for publication. The book is divided into three parts: "The Instrument," tracing the history of the cello and cello bow from earliest times,

"The Performers," anecdotes of historical cellists plus a long section on Markevitch's friend Piatigorsky, and "Great Moments for the Cello," development of cello repertoire. CelloMind is a two-part pedagogical method book that focuses on intonation and left-hand cello technique. The coauthors of the book are Hans Jørgen Jensen, Professor of cello at the Bienen School of Music at Northwestern University and Minna Rose Chung, Associate Professor of Cello at the Desautels Faculty of Music at the University of Manitoba. Part I: Intonation. The mystery of intonation is revealed by defining and explaining the scientific principles that govern it. To know and understand how to combine the three primary intonation systems has never before been expounded in a methodology publication--and for good reason. Playing with exquisite intonation has mostly been reserved for those who possess a strong intuitive sense; however, CelloMind breaks down this taboo using a systematic approach with a highly attuned manner. The three systems of intonation that string players most commonly use today--equal temperament, just intonation, and Pythagorean tuning--are each explored and explained in great detail. All chapters in the book include many practical samples and listening exercises that bridge the gap between the theory and its application. The chapters on intonation conclude with practical examples from the following repertoire: "Intonation Performance Practice in the Bach Solo Cello Suites" and "Intonation Performance Practice with Piano." Part II: Left-Hand Technique. The left-hand technique chapters in this section complement the study of intonation by providing a solid foundation of skills for essential cello playing. The topics and exercises have been selected to cover a wide range of technical skills that include playing with a light left-hand touch, speed, coordination, balanced vibrato, agility, finger independence, and efficient shifting. Original exercises developed for students over many years have also been incorporated into these chapters, as well as studies from Julius Klengel, Bernhard Cossmann, Louis R. Feuillard, Jean-Louis Duport, Yakov Rosenthal, and Fritz Albert Christian Rudinger. Cellists will enjoy this book of complete technical studies, offering scales, arpeggios, phrasing, tone production, and much more. A must for all advancing students. Kalmus Editions are primarily reprints of Urtext Editions, reasonably priced and readily available. They are a must for students, teachers, and performers. This book offers a practical demonstration of the style and technique of string playing which we believe makes for the best effect, under ordinary modern conditions of performance, in baroque music. A collection of piano solos composed by Theodor Kullak. Jack, Keiko, and Arty are back in the exciting second installment of the Rafters series. At the conclusion of the first book, the gang was unable to find Jack's older brother, Ben, who'd fallen overboard while riding the magic raft down the Dunmoore River. Book two begins with Jack and Keiko returning to the fair grounds to look for the old junk dealer who'd sold them the raft. Although the man is nowhere to be found, the kids find an old map they believe holds the secret to Ben's whereabouts. Despite their last frightening trip down river, Jack, Keiko, and Arty return for more thrills on their magical raft, only to discover that the map they've

placed their faith in transports them to a place from which they may never return! Will Jack find Ben? Will the kids discover the identity of the old man who sold them the raft? These questions and others are finally revealed in this gripping new installment of *Rafters!* An epic novel of Russia before and during the Revolution. This is a book dedicated to the significance and legacy of landmark cases in the field of intellectual property. Eleven well-known scholars offer in-depth commentary and analysis of cases that have made an impact on legal theory or critical thinking about the scope and purpose of the protection of intellectual and industrial creativity. All the cases covered have proven useful in developing doctrine, even though subsequent developments have made some appear and misleading rather than leading, and for some recent cases it is too early to say whether their approach will become mainstream. Among the fundamental questions all profoundly interesting, and to which no definite answers have yet been found arising in the course of the analysis are the following: Who should be master over the reputation, esteem and legacy of authors and their works authors and their heirs, or subsequent copyright owners? What, if any, protection should be granted to achievements in the absence of confusion? Should prevention of unfair competition allow one to reap what one has not sown? Should we protect commercial investment beyond the scope of defined intellectual property rights? Should it be considered a tort to use a well-known mark in a way that may dilute its repute and distinctive character? What kinds of monopolies should be protected, if any? Does the patent system in its current form allow us to question the assumption that technological progress is good per se, and that novel and inventive solutions should thus be protected? Should extraneous considerations such as public good and social usefulness be considered at the stages of grant and enforcement of patent rights? Should we grant patents over living organisms whose workings and reproduction are a long way from being completely understood? Should the rules developed for the enforcement of property rights limit a patentee's remedies to appropriate damages, thereby effectively granting a compulsory licence? The book concludes with an analysis of two case clusters remarkable for the worldwide dimension of the dispute. The authors show how litigation over Lego in about 30 jurisdictions and Budweiser in over 40 jurisdictions has enriched doctrine on such issues as contract, trade marks, trade names, geographical indications, property rights in general, human rights, and various international and bilateral treaties, all as they impinge on the protection of intellectual property rights. For scholars in the field, as well as for lawyers seeking a rich vein of doctrine to buttress a case, this unusual book will be of incomparable value. As a masterful clarification of salient doctrine, it represents a major contribution to the legal theory underpinning intellectual property law. A wonderful collection of miniature pieces reminiscent of childhood, similar to Schumann's *Album For The Young*. Each selection is delightful and entertaining for students and audiences of all ages. "Learning strategies for

musical success presents an overview of concepts that will enhance the lifelong enjoyment of learning music. It is geared towards classroom and studio music teachers, music students and parents" -- Introd. Op. 73 by David Popper has long been a staple for cellists to master technique and be able to play with fluidity on the instrument. Contents: * Opus 2, No. 1 * Opus 8 * Opus 42 * Opus 49, No. 1 * Opus 56, No. 4 * Opus 65 The first book to address the full range of performance issues for the violoncello from the Baroque to the early Romantic period. Richly illustrated with over 300 music examples, plates and figures, this book provides playing instructions which can easily be applied by modern players to their own performance of period music. How are we to assess the current popularity of period instruments and early-music performance? For musicians and audiences alike, the "historical authenticity" movement has increasingly influenced the performance of classical music. It has given us, claims Peter Kivy, "new and rewarding ways of listening to our musical repertory (as well as silly, vulgar, and unrewarding ones)." He believes that theory now overrules the ear in arguing for and justifying particular aesthetic decisions. In his customary engaging style, Kivy here mounts a philosophical inquiry into the desirability of using or re-creating historical performance. "Authenticity has become so widely accepted," he writes, "that why it should be accepted has become an unasked, indeed a forgotten question among the converted." In "How to Be Authentic," the first section of his book, he examines four different kinds of authenticity; in the second part, "Why to Be Authentic," he suggests how to evaluate them. Discussing issues that he cares about passionately, Kivy provides ammunition for both camps—those who follow authentic performance practice and those who do not. It is his hope that this book provides the groundwork for dialogue between musicians and philosophers. "I look forward to that," he says, "and to being, when it comes, in the thick of things." Excerpt from *Orchestration: A Practical Handbook* Teaching experience over a period of many years at all levels provided the data for this text. It is because this experience showed conclusively the regularity of common errors dealing essentially with purely technical aspects of structural problems that equal proportions of textures and timbres have been incorporated as basic text materials. the bass saxophone, piano, vibraphone, and an array of other instruments. He even introduced some, such as the harmonica-like cuesnophone, called Goofus, never before wielded in jazz. *Adrian Rollini: The Life and Music of a Jazz Rambler* draws on oral history, countless vintage articles, and family archives to trace Rollini's life, from his family's arrival in the US to his development and career as a musician and to his retirement and death. A child prodigy, Rollini was playing the piano in public at the age of five. At sixteen in New York he was recording pianola rolls when his peers recognized his talent and asked him to play xylophone and piano in a new band, the California Ramblers. When he decided to play a relatively new instrument, the bass saxophone, the Ramblers made their mark on jazz forever. Rollini became the man who gave this instrument its place. Yet he did not limit himself to playing bass parts—he became the California Ramblers' major soloist and created the studio and public sound of the band. In 1927 Rollini led a new band that included such jazz greats as Bix Beiderbecke and Frank Trumbauer. During the Depression years, he was back in New York playing with several bands including his own New California Ramblers. In the 1940s, Rollini purchased a property on Key Largo. He rarely performed again for the public but hosted rollicking jam sessions at his fishing lodge with some of the best nationally known and local players. After a car wreck and an unfortunate hospitalization, Rollini passed away at age fifty-three.

The increasing frequency and intensity of information aggression targeting the United States and its European allies demands more thorough consideration of concepts and practices for protecting against, resisting, and mitigating the effects of psychological manipulation and influence. Russia, in particular, often appears to use messaging and intimidation as part of its efforts to influence multiple actors and countries, including the United States and its European allies. Unfortunately, however, concepts and practices for understanding and resisting the potential effects of efforts conducted by Russia and its agents are few. To address this, United States European Command (USEUCOM) asked the RAND Corporation to identify strategies for defending against the effects of Russia's efforts to manipulate and inappropriately influence troops, government decisionmaking, and civilians. In this report, RAND researchers describe apparent efforts conducted by Russia and its agents involving the use of information to shape Russia's operating environment, focusing on the European context; review and apply existing research on influence and manipulation to these efforts; and draw from existing practice to describe possible defensive approaches that USEUCOM and its various partners can consider using when defending against these actions. The framework they use offers a way to conceptualize the objectives, tactics, and tools of Russian information efforts in Europe.
