In his classic 16th-century treatise that justifies and praises manipulation and occasional brutality as the best tools for those who want to hold power, The Prince, Niccolo Machiavelli wrote, "It is much safer to be feared than loved." About five centuries later, Robert Greene wrote his book, The 48 Laws of Power, re-enforcing the Machiavellian interpretation of power and the means for achieving power. In his book, Robert Greene argues, "The need for power is so fundamental, so essentially human, that when you feel you have no power over people or events, you are likely to be depressed." Greene further describes the laws of power that will show readers how to gain power and influence. Both Machiavelli and Greene want us to believe that achieving and keeping power require coercion, dishonesty and manipulation. A Guide to Robert Greene's The 48 Laws of Power-Summary and Analysis, Key Ideas and Facts, includes a summary of each law of power discussed in Greene's book. It also provides an analysis of Greene's laws of power and the principal messages of Greene's book. Moreover, A Guide to Robert Greene's The 48 Laws of Power discusses various cases that demonstrate how manipulative people apply the laws of power in the modern world and how you can use some ideas from the laws of power without resorting to deceit and manipulation.

Digital Competition Law in Europe Feb 21 2020 'Digital competition', a term and concept that has risen to the forefront of competition law, may be viewed as both promising and cautionary: on the one hand, it brings the promises of increased speed, efficiency and objectivity, and, on the other, it entails potential pitfalls such as hard-to-identify pathways to unfair pricing, dominant positions and their potential abuse, restriction of choice and abuse of personal data. Accordingly, jurisdictions around the world are taking measures to deal with the phenomenon. In this concise but thoroughly researched book – both informative and practical – lawyers from a prominent firm with a specialised digital competition team take stock and examine the state of digital competition in the enforcement practices of six competition authorities in Europe, most of these forerunners in the field of digital competition policy and enforcement. The competition authorities surveyed are those of the European Union, the United Kingdom, France, Germany, the Netherlands and Belgium. For each, an overview, spanning the period from 2012 to mid-2019, includes not only landmark cases in which digital technologies have had a significant impact on the competition law outcome but also guidance documents such as speeches, policy statements, industry surveys and research reports. Activities and enforcement practices of the various authorities include the following and more: degree of activity; focus of the activity; enforcement styles; enforcement instruments; visible effectiveness of enforcement; and important insights and outlooks. Each overview contains separate chapters on the cartel prohibition, the prohibition of abuse of a dominant position and merger control. An additional chapter evaluates the similarities and differences in the enforcement practices and the positive and negative effects of digital competition in the jurisdictions investigated, and a concluding chapter offers recommendations. An indispensable guide to quickly and accessibly acquiring in-depth knowledge in competition law in the digital sector, this matchless volume is a must-read for any practitioner or academic who encounters competition law related to digital markets. The dilemmas and challenges of the new competition law reality – which is here already, like it or not – are clearly explained here for the benefit of regulators, academics, policymakers, judges, in-house counsel and lawyers specialising in competition law and intellectual property law.

The 48 Laws of Power May 18 2022 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of The Laws of Human Nature. In the book that People magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
