Pliny the Elder on Science and Technology Jan 06 2021 The Elder Pliny's Natural History greatly influenced the content and character of subsequent technical literature. He has received little attention since the 1920s and this book is an overdue reassessment of Pliny's ideas and his text. Pliny had to adapt Latin and Greek to his scientific theories and this has rendered parts of his text ambiguous. Healy includes a detailed study of the technical language and also modern experiments simulating Pliny's techniques.

A Romanian Rhapsody Oct 15 2021 Maestro Sergiu Comissiona's biography reveals facts about his happy childhood in a Jewish petit bourgeois family in Bucharest – then, “the little Paris of Eastern Europe”, his adolescence under the Nazi specter, and his youth in repressive communist times behind the Iron Curtain. His life changes from the closed horizons of communist Romania to the broad ones of the Western world when he immigrates to Israel, later settling in England, then Sweden and, finally, the United States. His career path, from an ensemble violinist to an internationally-renowned conductor, is followed chronologically and analytically, based on his own accounts, extended research, and revealing testimonials. The Maestro's rationale of having his biography written was, in his own words, “for the Westerners to understand my deep attachment to my Romanian roots, for the Romanians to know about my struggle for artistic affirmation in the Western world, and mostly for young conductors to realize that through passion, patience and persistence – and by not committing suicide after the first failure – the dedicated commitment to the profession bears fruit.”

Bodies on the Verge Aug 13 2021 A collection that resets the terms of interpreting the Pauline letters Interpretation of Paul's letters often proves troubling, since people frequently cite them when debating controversial matters of gender and sexuality. Rather than focusing on the more common defensive responses to those expected prooftexts that supposedly address homosexuality, the essays in this collection reflect the range, rigor, vitality, and creativity of other interpretive options influenced by queer studies. Thus key concepts and practices for understanding these letters in terms of history, theology, empire, gender, race, and ethnicity, among others, are rethought through queer interventions within both ancient settings and more recent history and literature. Features: New options for how to interpret and use Paul's letters, particularly in light of their use in debates about sexuality and gender Developing approaches in queer studies that help with understanding and using Pauline letters and interpretations differently Key reflections on the two "clobber passages" (Rom 1:26-27 and 1 Cor 6:9) that demonstrate the relevance of a far wider range of texts throughout the Pauline corpus

The Mediterranean Tradition in Economic Thought Apr 01 2023 The Mediterranean Tradition in Economic Thought surveys the legacy of thinking on economic affairs from the countries in the Mediterranean basin over four millenia. It considers the economic content of the scriptures of the Mesopotamian civilisations, Pharaonic Egypt and the Biblical peoples and the contributions of the Greeks and Romans, and their influence on Islamic civilisation and on the Medieval scholastics. The flowering of the school of Salamanca as recently as the seventeenth century demonstrates how long-lived the tradition was, and throughout Baeck demonstrates how these ideas continue to survive and resurface, citing the renewed interest in the ethical dimension of economics, the revival of interest in the history of Islamic thought, and the re-emergence of Slavophile doctrines in contemporary Russian.

Usages of the Past in Roman Historiography Feb 28 2023 Usages of the Past in Roman Historiography contains 11 articles on how the Ancient Roman historians used, and manipulated, the past. Key themes include the impact of autocracy, the nature of intertextuality, and the frontiers between history and other genres.

Virtus Romana Nov 27 2022 The political transformation that took place at the end of the Roman Republic was a particularly rich area for analysis by the era's historians. Major narrators chronicled the crisis that saw the end of the Roman Republic and the changes that gave birth to a new political system. These writers drew significantly on the Roman idea of virtus as a way of interpreting and understanding their past. Tracing how virtus informed Roman thought over time, Catalina Balmaceda explores the concept and its manifestations in the narratives of four successive Latin historians who span the late Republic and early Principate: Sallust, Livy,

Velleius, and Tacitus. Balmaceda demonstrates that *virtus* in these historical narratives served as a form of self-definition that fostered and propagated a new model of the ideal Roman more fitting to imperial times. As a crucial moral and political concept, *virtus* worked as a key idea in the complex system of Roman sociocultural values and norms that underpinned Roman attitudes about both present and past. This book offers a reappraisal of the historians as promoters of change and continuity in the political culture of both the Republic and the Empire.

Microsoft Excel 2019 Formulas and Functions Dec 05 2020 Expert Paul McFedries helps you master key Excel 2019 and Office 365 tools for building more powerful spreadsheets. Use Excel 2019 and Office 365 core features to build spreadsheets that solve business problems and deliver reliable answers. Drawing on his unsurpassed experience, Paul McFedries helps you make the most of formulas and functions, including the latest improvements to arrays, formula error handling, and statistics. McFedries' step-by-step projects walk you through handling key tasks, from building timesheets to projecting cash flow and aging receivables. His practical examples and clear instructions demystify intermediate- to advanced-level formula construction, and help you leverage Excel's most useful functions in your everyday work. Becoming an Excel expert has never been easier! By reading this book, you will:

- Improve business analyses by adding intelligence and knowledge to your models
- Replace cumbersome formulas with convenient predefined functions
- Radically simplify complex calculations with Office 365's new dynamic arrays
- Use conditional formatting to reveal anomalies, problems, or opportunities
- Calculate loan payments, interest costs, terms, and amortization schedules
- Project the future value of investments, and plan to achieve investment goals
- Master essential discounting and cash-flow analysis tools, including net present value and internal rate of return
- Sort, filter, and analyze tabular data, from customers to inventory
- Easily analyze huge data sets with PivotTable calculations

About This Book

- For everyone who wants to get more done with Microsoft Excel in less time
- For business and financial professionals, entrepreneurs, students, and others who need to efficiently manage and analyze data

Law, religion, and education considered in three Essays Jan 30 2023

Next Generation Excel Jan 24 2020 Take Excel to the next level in accounting and financial modeling In this new Second Edition of *Next Generation Excel*, Isaac Gottlieb shows financial analysts how to harness the full power of Excel to move forward into the new world of accounting and finance. Companies of all sizes use financial models to analyze their finances and plan business operations, as well as to create financial accounting reports like balance sheets, income statements, and statements of cash flows. While many businesspeople are quite familiar with the reports created with financial models, most are not as familiar with the creation of the models themselves. This book shows them how to build an accurate and effective financial model using the solid functionality and easy usability of Excel. Fully updated and revised to include support for Apple users Written by a professor of management and statistics who has taught the discipline for fifteen years Appropriate for professional financial analysts, as well as MBA students For professionals and students whose responsibilities or studies include a full understanding of financial modeling, *Next Generation Excel, Second Edition* offers comprehensive training.

Horace: Odes IV and Carmen Saeculare Apr 20 2022 The *Carmen Saeculare* was composed and published in 17 BCE as Horace was returning to the genre of lyric which he had abandoned six years earlier; the fourth book of *Odes* is in part a response to this poem, the only commissioned poem we know from the period. The hardening of the political situation, with the Republic a thing of the past and the Augustan succession in the air, threw the problematic issue of praise into fresh relief, and at the same time provided an impulse towards the nostalgia represented by the poet's private world. Professor Thomas provides an introduction and commentary (the first full commentary in English since the nineteenth century) to each of the poems, exploring their status as separate lyric artefacts and their place in the larger web of the book. The edition is intended primarily for upper-level undergraduates and graduate students, but is also important for scholars.

Paideia Romana Dec 29 2022 *Paideia Romana: Cicero's Tusculan Disputations* takes a new look at an unloved text of the western canon to reveal it as a punchy and profoundly original work, arguably Cicero's most ingenious literary response to the tyranny of Caesar. The book shows how the Tusculans' much lambasted literary design, critically isolated prefaces, and overlooked didactic plot start to cohere once we read the dialogue for what it is: not a Latin treatise on Greek philosophy, but a Roman drama on education, with a strong political subtext. The first chapter ('The form – enigmas and answers') tries to make sense of those features of the work that scholars have found baffling or disappointing, such as the nondescript characters, the uncertain genre, or the lack of setting. Chapter 2 ('The prologues – in tyrannum and cultural warfare') analyses how Cicero in his prologues to the five individual books situates his desire to create and teach a 'Latin philosophy' within wider contexts, in particular the dictatorship of Caesar and the intellectual traditions of Greece and Rome. The final chapter 3 ('The plot – teacher and student') explores the pedagogy enacted in the dialogue as a form of constructive outreach, addressed to a future generation of Roman aristocrats. With its emphasis on rhetoric, literary artistry, and historical context, the present volume breaks with earlier scholarship on the Tusculans and thereby makes a significant contribution to the on-going reassessment of Cicero's thought and authorial practice.

Chambers's encyclopædia Dec 17 2021

Temples and Sanctuaries in the Roman East Feb 04 2021 This lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and sanctuaries built in the Roman East between the end of the 1st century BCE and the end of the 3rd century CE, within a broad region encompassing the modern states of Syria, Lebanon, Israel and Jordan. Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome. The source of this power lay in the uniformity of the architectural language, the inventory of forms, the choice of styles and the spatial layout of the buildings. Thus, while temples have an eclectic character, there is an underlying unity of form comprising the podium, the stairway between the terminating walls (antae) and the columns along the entrance front - in other words, the axially, frontality and symmetry of the temple as viewed from outside. The temples and sanctuaries studied in this volume demonstrate individual nuances of plan, spatial design, location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories: Vitruvian temples (derived from Hellenistic-Roman architecture) and Non-Vitruvian temples (those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius). The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion.
