Oracle Database Programming with Visual Basic.NET The

Gender Dimension of Social Change *I Will Always Write Back*

Oracle Database Programming with Visual Basic.NET Discover a detailed treatment of the practical considerations and applications of Oracle database programming with Visual Basic 2019 Oracle Database Programming with Visual Basic.NET: Concepts, Designs, and Implementations delivers a comprehensive exploration of the foundations of Oracle database programming using Visual Basic.NET. Using Visual Basic.NET 2019, Visual Studio.NET 2019, and Oracle 18c XE, the book introduces the Oracle database

development system, Oracle SQL Developer and Modeler, and teaches readers how to implement a sample database solution. The distinguished author also demonstrates the use of dotConnect for Oracle to show readers how to create an effective connection to an Oracle 18c XE database. The current versions of the .NET framework, ASP.NET, and ASP.NET 4.7 are also explored and used to offer readers the most up to date web database programming techniques available today. The book provides practical example projects and detailed, line-by-line descriptions throughout to assist readers in the development of their database

programming skill. Students will also benefit from the inclusion of: A thorough introduction to databases, including definitions, examples, descriptions of keys and relationships, and some database components in popular databases, like Access, SQL, and Oracle An exploration of ADO.NET, including its architecture and components, like the DataReader class, DataSet component, DataTable component, and the command and parameter classes A discussion of Language Integrated Query (LINQ), including its architecture and components, its relationship to objects, DataSet, Oracle, and Entities An explanation of how

to access data in ASP.NET and ASP.NET Web Services with multiple real project examples. Perfect for college and university students taking courses related to database programming and applications, Oracle Database Programming with Visual Basic.NET will also earn a place in the libraries of programmers and software engineers seeking a comprehensive reference for database coding in Visual Basic.NET. Plan and deploy identity-based secure access for BYOD and borderless networks Using Cisco Secure Unified Access Architecture and Cisco Identity Services Engine, you can secure and regain control of borderless

networks in a Bring Your Own Device (BYOD) world. This book covers the complete lifecycle of protecting a modern borderless network using these advanced solutions, from planning an architecture through deployment, management, and troubleshooting. Cisco ISE for BYOD and Secure Unified Access begins by reviewing the business case for an identity solution. Next, you'll walk through identifying users, devices, and security posture; gain a deep understanding of Cisco's Secure Unified Access solution; and master powerful techniques for securing borderless networks, from device isolation to protocol-

independent network segmentation. You'll find in-depth coverage of all relevant technologies and techniques, including 802.1X, profiling, device onboarding, guest lifecycle management, network admission control, RADIUS, and Security Group Access. Drawing on their cutting-edge experience supporting Cisco enterprise customers, the authors present detailed sample configurations to help you plan your own integrated identity solution. Whether you're a technical professional or an IT manager, this guide will help you provide reliable secure access for BYOD, CYOD (Choose Your Own Device), or any IT model you choose.

Review the new security challenges associated with borderless networks, ubiquitous mobility, and consumerized IT Understand the building blocks of an Identity Services Engine (ISE) solution Design an ISE-Enabled network, plan/distribute ISE functions, and prepare for rollout Build context-aware security policies Configure device profiling, endpoint posture assessments, and guest services Implement secure guest lifecycle management, from WebAuth to sponsored guest access Configure ISE, network access devices, and supplicants, step-by-step Walk through a phased deployment that ensures zero downtime

Apply best practices to avoid the pitfalls of BYOD secure access Simplify administration with self-service onboarding and registration Deploy Security Group Access, Cisco's tagging enforcement solution Add Layer 2 encryption to secure traffic flows Use Network Edge Access Topology to extend secure access beyond the wiring closet Monitor, maintain, and troubleshoot ISE and your entire Secure Unified Access system This core textbook provides students with a concise and user-friendly overview of the marketing research process, taking a refreshingly non-technical approach. The goal of this focused text is to equip

students with the skills needed to interpret and implement the outcomes of such research to effectuate meaningful change. Keeping digital data and internet research at its heart, Marketing Research details the main stages of the research process, covering both quantitative and qualitative methods and offers a plethora of case studies and examples. Now in its fourth edition, this popular and accessible textbook is ideal for use on marketing research courses at diploma, undergraduate, postgraduate and MBA levels. This book has also been written to support The Market Research Society's Diploma Module: The Principles of

Market & Social Research. New to this Edition: - Expanded coverage of qualitative analysis, now with its own dedicated chapter - Fresh material on hot topics such as big data analytics, social media listening and data visualization - Updated content on online surveys, online group discussions and online samples, as well as data protection legislation - Added 'Industry Viewpoint' features setting out the latest thinking from practitioners on important topics - New author video introductions to each chapter and 'Careers in Marketing Research' video suite featuring the advice and experiences of a range of practitioners around

the world - New opening cases featuring well-known, international organizations The New York Times bestselling true story of an all-American girl and a boy from Zimbabwe - and the letter that changed both of their lives forever. It started as an assignment. Everyone in Caitlin's class wrote to an unknown student somewhere in a distant place. Martin was lucky to even receive a pen-pal letter. There were only ten letters, and fifty kids in his class. But he was the top student, so he got the first one. That letter was the beginning of a correspondence that spanned six years and changed two lives. In this compelling dual memoir,

Caitlin and Martin recount how they became best friends--and better people--through their long-distance exchange. Their story will inspire you to look beyond your own life and wonder about the world at large and your place in it. This comprehensive handbook provides a unique overview of the theory, methodologies and best practices in climate change communication from around the world. It fosters the exchange of information, ideas and experience gained in the execution of successful projects and initiatives, and discusses novel methodological approaches aimed at promoting a better understanding of climate change adaptation.

Addressing a gap in the literature on climate change communication and pursuing an integrated approach, the handbook documents and disseminates the wealth of experience currently available in this field. Volume 2 of the handbook provides a unique description of the theoretical basis and of some of the key facts and phenomena which help in achieving a better understanding of the basis of climate change communication, providing an essential basis for successful initiatives in this complex field. This book explores the ways in which systems (organizational) consultation may be applied to school roles and functions as

part of an overall systems change process. Using an implementation science framework grounded in systems/organizational consultation research, the volume details how school reform or improvement may be facilitated. School-based case studies illustrate the application of implementation science to systems change efforts in schools and districts across the United States. Each case study describes the implementation science steps taken to deliver a school-based innovation at the systems level. The book discusses implementation science theory combined with real-world examples of its use in planning

for, implementing, and engaging in ongoing evaluation of a systems change effort. Key areas of coverage include: Implementation science in educational settings. Key stakeholder roles in school-based systems change. Implementing and evaluating systems change in schools. Teacher-student mediation to reduce conflict and ensure effective school discipline and behavior practices. District-level processes and supports for English Language Learners. Mental health screening and social-emotional well-being of students. Systems Consultation and Change in Schools is an essential resource for researchers, professors, and

graduate students as well as scientist-practitioners, school-based practitioners, and clinicians across such disciplines as school administration and leadership, school and clinical child psychology, social work, public health, teaching and teacher education, educational policy and practice, and all interrelated fields. In business, communication counts. If written clearly and structured well, your letters, emails, reports and other documents will achieve better results. This book is a practical and comprehensive guide that not only tells you how to do this, but also gives you easy to use examples that you can lift

straight off the page and adapt for your own use. Contains over 300 sample documents covering a wide range of business situations, as well as practical advice on content, language, style and structure. Two brothers share their inspiring story of how they were called to service in this handbook that encourages everyone to say yes to making a difference. Kent Schietinger and Grant Schietinger had no idea where they would wind up when they began their journey and they stumbled upon their service project to build a school in Uganda by chance. Some of the steps they took to raise money were obvious, but other things, like writing grant

proposals, required lots of research. In looking back at their efforts, they reveal how to: appreciate the power you have to change the world seek out vast opportunities to serve others raise large amounts of money to support your cause enjoy all that life has to offer while also helping others. In addition to practical advice, they also share a resources chapter filled with project ideas, sample solicitation letters, grant applications, charities to consider, and more. Their message is meant for people of all ages but particularly teens and those on the cusp of their teen years. Join them in Making Time to Change the World. Managing

Tourism in a Changing World provides an overview of state-of-the-art research surrounding today's tourism management. Recognising the relevance of tourism activities as major economic drivers, this book offers a significant contribution to the advancement of managerial practice in the tourism field. It is the outcome of the collective intellectual efforts of a number of scholars, with dissimilar geographical roots and backgrounds, who cultivate original research on tourism management from a variety of perspectives (economic, managerial) and using multiple methods (theory building, experimental and inductive case-based inquiries).

While drawing on multiple theoretical perspectives and adopting different epistemological paradigms and methodologies, this book answers a wide range of research questions related to a number of relevant themes in the following fields: destination management, marketing and branding, inter-organizational dynamics and corporate social responsibility in the tourism sector. This book was originally published as a special issue of Anatolia. How To Write Anything: The Format Of What You Write May Change But The Process Of Writing Anything Remains The Same This book is called How To Write Anything, and I confess there is some ego

involved in the title. But then I've been a professional writer for over 40 years. As one of Canada's most successful writers and authors, I have written hard news articles, soft news and feature articles, advertising and promotional copy, media releases, reports and proposals, case studies, research papers, email messages, website content, tweets, blog posts, and other online content. I have also written over 20 books on business, promotional and online writing and other topics, such as writing articles, memoir writing and living with Multiple Sclerosis, a disease that I have, but one that has not prevented me from writing

or training. I've also written a collection of short stories, poetry, and a couple of plays. So while I haven't written everything, I've written many things. The fact is that you can't read this book and go forth and write anything if you are not familiar with the format or structure of the document that you want to write--be it non-fiction or fiction. For instance, if you want to write a report, you do so using the methods in this book. However, you have to know how to structure reports. The same is applicable to email, social media content, articles, promotional content, case studies, reports, white papers, PowerPoint presentations,

speeches, website content, short stories or novels. So some of you reading this book might still have some learning to do. However, I suspect most of you know the structure of the documents you want to produce and you will be able to immediately apply the methods outlined in the book to writing any document that you need to write. This updated and improved guide is designed to help accountants effectively perform SOC 1® engagements under AT-C section 320, Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting, of Statement on Standards for

Attestation Engagements (SSAE) No. 18, Attestation Standards: Clarification and Recodification. With the growth in business specialization, outsourcing tasks and functions to service organizations has become increasingly popular, increasing the demand for SOC 1 engagements. This guide will help: Gain a deeper understanding of the requirements and guidance in AT-C section 320 for performing SOC 1 engagements. Obtain guidance from top CPAs on how to implement AT-C section 320 and address common and practice issues. Provide best in class services related to planning, performing, and

reporting on a SOC 1 engagement. Successfully implement changes in AT-C section 320 arising from the issuance of SSAE 18, which is effective for reports dated on or after May 1, 2017. Determine how to describe the matter giving rise to a modified opinion by providing over 20 illustrative paragraphs for different situations. Understand the kinds of information auditors of the financial statements of user entities need from a service auditor's report. Implement the requirement in SSAE No. 18 to obtain a written assertion from management of the service organization. Organize and draft relevant sections of a type

2 report by providing complete illustrative type 2 reports that include the service auditor's report, management's assertion, the description of the service organization's system, and the service auditor's description of tests of controls and results. Develop management representation letters for SOC 1 engagements. Do you dream of making a six-figure income with your music? Would you like to leave your job and be a full-time, touring musician? This book will show you how. I spent almost three decades making my living as a professional musician - playing over 300 shows a year. I make a very comfortable living - well into the six figures - every year,

and have for over a decade now. I do not have a record label, a manager or an agent. I am 100% independent and run my entire business from my laptop, my phone and with my guitar. I am a master at booking great paying gigs - and I will teach you all the tips and tricks you need to know. This book is for any musician in any genre of music. Beyond the money - which is awesome - I am able to live the life of my dreams! I can not guarantee that this book will make you famous. I am definitely not famous. This is not a "get rich quick" scheme. This takes hard work. However, if you follow the steps in this book, I can absolutely guarantee that you

will make money. Good money. And if you are really serious about your craft and about your business, I can guarantee without a shadow of a doubt, that you will make GREAT money by following the methods I outline in this book. Here are just a few things you will learn in this book:

- How to easily book 300+ great paying shows a year!
- How to earn a six-figure income from your music!
- How to develop yourself as a marketable artist
- How to send emails that will get results...gig bookings!
- How to find gigs and contact venues successfully
- How to form a "brand bible" around yourself
- How to create a fan base and impressive social

media stats

- How to manipulate reality to be taken more seriously as an artist
- How to focus on your true goals, desires and dreams
- How to "give birth to a star"...you!
- How to build an impressive team - from agent to record label
- How to have an awesome website with the essentials to get gigs
- How to build a website for almost no money
- How to build a database of awesome gigs and leads
- How to always get repeat bookings ...and so much more!

This book includes multiple email templates which I have used successfully for the past decade to book gigs...you can copy and paste them to start booking your own shows

immediately. Oh! Be sure to look for the two companion books - Tour Europe and The Contract - both are a nice addition to The Successful Musician Mindset. Testimony from G.R., a reader of this book: "I purchased your Successful Musician Mindset book and was extremely impressed! Honestly the best book on the practical application of the music business I have ever read! I have read your book twice and, I have to say again, the information you gave was absolutely golden! I have been looking EVERYWHERE for a practical music business book discussing how to book a national tour step by step and

you delivered a phenomenal amount of information in the most specific manner." Manuela Stoll focuses on two strategies to address change: adapting to change and creating change. Using a large-scale survey among top executives of manufacturing firms in Germany, she evaluates the importance of a range of resources, competences, and "isolating mechanisms" (shields against imitation) for the success of these strategies. She shows that adapting to change has an important effect on firm performance and is mainly influenced by a firm's industry foresight abilities. She also illustrates how these abilities

can be strengthened. Changing Realities of Work and Family is an interdisciplinary volume that examines the multiple realities of work and family from academic, commercial, and political perspectives. The book Brings together works by an extraordinary list of contributors, including Jane Swift, former governor of Massachusetts; practitioners from industry; the leading attorney in discrimination against mothers and pregnant women; and outstanding academics from psychology, business, economics, and human relations Examines work and family in the political arena, gay and lesbian workers, work

and family as it relates to age, single mothers, and the role of culture and community. Includes original empirical articles written expressly for this work, in which the most current research on the field of work and family will be presented. Provides "real world" examples of the intersection of work and family in such fields as business, government, and the law. An investigation into how specific Web technologies can change the dynamics of organizing and participating in political and social protest. Much attention has been paid in recent years to the emergence of "Internet activism," but scholars and pundits disagree about whether

online political activity is different in kind from more traditional forms of activism. Does the global reach and blazing speed of the Internet affect the essential character or dynamics of online political protest? In *Digitally Enabled Social Change*, Jennifer Earl and Katrina Kimport examine key characteristics of web activism and investigate their impacts on organizing and participation. Earl and Kimport argue that the web offers two key affordances relevant to activism: sharply reduced costs for creating, organizing, and participating in protest; and the decreased need for activists to be physically together in order to act together. Drawing

on evidence from samples of online petitions, boycotts, and letter-writing and e-mailing campaigns, Earl and Kimport show that the more these affordances are leveraged, the more transformative the changes to organizing and participating in protest. The *Official Ubuntu Packaging Guide* is primarily addressed to those who would like to make and maintain Ubuntu packages. Although many of the concepts in this guide could be used to make binary packages for personal use, it is designed for those people wanting to distribute their packages to and for others. Magnify your real-world impact as you lead others in a social change

organization In Management In a Changing World: How to Manage for Equity, Sustainability, and Results renowned social changemakers Jakada Imani, Monna Wong, and Bex Ahuja deliver an effective and practical how-to guide for the equitable management of nonprofit and social change organizations. In the book, you'll learn how to multiply your impact by using the authors' insightful strategies for delegation, goal setting, and team culture-building. You'll also discover how to fairly exercise power in an environment that spans racial, generational, gender, and other identity divides. Management In a Changing

World shows you how to: Create work-life balance for your team members in an age when we have virtually unlimited access to our colleagues' attention and time Support team members through life's challenges while still meeting the demands your social change organization faces Bridge the gap between your intentions and your real-world impact with actionable advice, tools, and resources An essential resource for rookie and veteran managers, executive directors, and CEOs, Management In a Changing World will also earn a place on the bookshelves of organizers managing teams of volunteers. In conjunction with top survey

researchers around the world and with Nielsen Media Research serving as the corporate sponsor, the Encyclopedia of Survey Research Methods presents state-of-the-art information and methodological examples from the field of survey research. Although there are other "how-to" guides and references texts on survey research, none is as comprehensive as this Encyclopedia, and none presents the material in such a focused and approachable manner. With more than 600 entries, this resource uses a Total Survey Error perspective that considers all aspects of possible survey error from a cost-benefit standpoint.

Transformation and Your New EHR offers a robust communication and change leadership approach to support electronic health record (EHR) implementations and transformation journeys. This book highlights the approach and philosophy of communication, change leadership, and systems and process design, giving readers a practical view into the successes and failures that can be experienced throughout the evolution of an EHR implementation. Cisco NAC Appliance Enforcing Host Security with Clean Access Authenticate, inspect, remediate, and authorize end-point devices using Cisco NAC

Appliance Jamey Heary, CCIE® No. 7680 Contributing authors: Jerry Lin, CCIE No. 6469, Chad Sullivan, CCIE No. 6493, and Alok Agrawal With today's security challenges and threats growing more sophisticated, perimeter defense alone is no longer sufficient. Few organizations are closed entities with well-defined security perimeters, which has led to the creation of perimeterless networks with ubiquitous access. Organizations need to have internal security systems that are more comprehensive, pervasive, and tightly integrated than in the past. Cisco® Network Admission Control (NAC) Appliance,

formerly known as Cisco Clean Access, provides a powerful host security policy inspection, enforcement, and remediation solution that is designed to meet these new challenges. Cisco NAC Appliance allows you to enforce host security policies on all hosts (managed and unmanaged) as they enter the interior of the network, regardless of their access method, ownership, device type, application set, or operating system. Cisco NAC Appliance provides proactive protection at the network entry point. Cisco NAC Appliance provides you with all the information needed to understand, design, configure, deploy, and troubleshoot the

Cisco NAC Appliance solution. You will learn about all aspects of the NAC Appliance solution including configuration and best practices for design, implementation, troubleshooting, and creating a host security policy. Jamey Heary, CCIE® No. 7680, is a security consulting systems engineer at Cisco, where he works with its largest customers in the northwest United States. Jamey joined Cisco in 2000 and currently leads its Western Security Asset team and is a field advisor for its U.S. Security Virtual team. His areas of expertise include network and host security design and implementation, security

regulatory compliance, and routing and switching. His other certifications include CISSP, CCSP®, and Microsoft MCSE. He is also a Certified HIPAA Security Professional. He has been working in the IT field for 13 years and in IT security for 9 years. Understand why network attacks and intellectual property losses can originate from internal network hosts Examine different NAC Appliance design options Build host security policies and assign the appropriate network access privileges for various user roles Streamline the enforcement of existing security policies with the concrete measures NAC

Appliance can provide Set up and configure the NAC Appliance solution Learn best practices for the deployment of NAC Appliance Monitor, maintain, and troubleshoot the Cisco NAC Appliance solution This security book is part of the Cisco Press® Networking Technology Series. Security titles from Cisco Press help networking professionals secure critical data and resources, prevent and mitigate network attacks, and build end-to-end self-defending networks. Category: Cisco Press-Security Covers: End-Point Security Expert advice for Exchange Server 2016 and Exchange Online right at your fingertips. Practical and

Preparing Principals for a Changing World provides a hands-on resource for creating and implementing effective policies and programs for developing expert school leaders. Written by acclaimed author and educator Linda Darling-Hammond and experts Debra Meyerson, Michelle LaPointe, and Margaret Terry Orr, this important book examines the characteristics of successful educational leadership programs and offers concrete recommendations to improve programs nationwide. In a study funded by the Wallace Foundation, Darling-Hammond and the team examined eight exemplary principal development

programs, as well as state policies and principals' experiences across the country. Using the data from the study, they reveal how successful programs are structured, the skills and knowledge participants gain, and what they are able to do in practice as school leaders as a result. What do these exemplary programs have in common? Aggressive recruitment; close ties with schools in the community; on-the-ground training under the wing of expert principals, and a strong emphasis on the cutting-edge theories of instructional and transformational leadership. In addition to highlighting the programs' similarities, the

study also explains the differences among the programs and sheds light on the effectiveness of approaches and models from different states and contexts? East, West, North, and South; urban and rural; pre-service and in-service. The authors analyze program outcomes for principals and their schools, including illustrative case studies and educators' voices on the influence of programs' strategies for recruitment, internships, mentoring, and coursework. The ideas and suggestions outlined in *Preparing Principals for a Changing World* are presented with the goal of increasing the number of highly qualified,

thoughtful, and innovative educational leaders. personal and professional communications with clarity, confidence, and style. *How to Write It* is the essential resource for eloquent personal and professional self-expression. Award-winning journalist Sandra E. Lamb transforms even reluctant scribblers into articulate wordsmiths by providing compelling examples of nearly every type and form of written communication. Completely updated and expanded, the new third edition offers hundreds of handy word, phrase, and sentence lists, precisely crafted sample paragraphs, and professionally designed document layouts. *How to Write It* is a must-own

for students, teachers, authors, journalists, bloggers, managers, and anyone who doesn't have time to wade through a massive style guide but needs a friendly desk reference. This new study uses longitudinal data to provide new insights into the changing dynamics of lives of women today. In particular, it explores the potential of longitudinal or life course analysis as a powerful tool for appreciating the gender dimension of social life. Manage complex systems with ease and equip yourself for a new career. This book builds upon the skills you learned in Volumes 1 and 2 of this course and it depends upon the virtual network and

virtual machine you created there. However, more experienced Linux users can begin with this volume and download an assigned script that will set up the VM for the start of Volume 3. Instructions with the script will provide specifications for configuration of the virtual network and the virtual machine. Refer to the volume overviews in the book's introduction to select the volume of this course most appropriate for your current skill level. Start by reviewing the administration of Linux servers and install and configure various Linux server services such as DHCP, DNS, NTP, and SSH server that will be used to provide advanced

network services. You'll then learn to install and configure servers such as BIND for name services, DHCP for network host configuration, and SSH for secure logins to remote hosts. Other topics covered include public/private keypairs to further enhance security, SendMail and IMAP and antispam protection for email, using Apache and WordPress to create and manage web sites, NFS, SAMBA, and Chrony. This volume also covers SELinux, and building RPMs to distribute automation scripts. All of these services are installed on a single server host over the course of the book and by the time you are finished you will have a single server

that provides these services for your network. What You Will Learn Install, configure, and manage several Linux server services such as email with spam management and single and multiple web sites Work with NTP time synchronization, DHCP, SSH, and file sharing with Unix/Linux and Windows clients Create RPMs for distribution of scripts and administrative programs. Understand and work with enhanced security. Who This Book Is For Those who are already Linux power users - SysAdmins who can administer Linux workstation hosts that are not servers - who want to learn to administer the services

provided by Linux servers such as web, time, name, email, SSH, and more. This book constitutes the refereed proceedings of the 14th International Conference on Persuasive Technology, PERSUASIVE 2019, held in Limassol, Cyprus, in April 2019. The 29 full papers presented were carefully reviewed and selected from 79 submissions. The papers demonstrate how persuasive technologies can help solve societal issues. They were subsequently grouped in the following topical sections: Terminologies and methodologies; self-monitoring and reflection; systems development process; drones

and automotives; ethical and legal aspects; special application domains; motivation and goal setting; personality, age and gender; social support; user types and tailoring. Educational leadership draws upon interdisciplinary literature, but distinguishes itself through its focus on pedagogy, epistemology, and human development. As a field of study, it has prescribed pertinent philosophies and practices and has specified specific roles for school administrators and teachers. *Technology and Its Impact on Educational Leadership: Innovation and Change* covers not only K-12 and higher

education leadership, but also the relationship between Web 2.0 technologies and educational leadership. Contributions within this book discuss chronic issues in the study of technology and its impact on educational leadership that have perplexed educational establishments. This work promotes learning and further research for professors, scholars, researchers, and graduate students involved in educational leadership and related fields. Change management and organizational development is unthinkable without people. Human beings form its core as both subjects and objects of

change. This volume attempts to cut through to the core of change management, to the people that stand at its heart and focuses on their intrinsic role in change management and organizational development. Topics covered in this volume encompass the human element within organizational change, how this impacts roles, dynamics of team interaction and affects the workplace in teaching and learning settings. It also addresses resistance to institutional and organizational change and the central role that agile management plays in this process. Over the past few decades, US business and industry have been

transformed by the advances and redundancies produced by the knowledge economy. The workplace has changed, and much of the work differs from that performed by previous generations. Can human capital accumulation in the United States keep pace with the evolving demands placed on it, and how can the workforce of tomorrow acquire the skills and competencies that are most in demand? *Education, Skills, and Technical Change* explores various facets of these questions and provides an overview of educational attainment in the United States and the channels through which labor force skills and education affect GDP growth.

Contributors to this volume focus on a range of educational and training institutions and bring new data to bear on how we understand the role of college and vocational education and the size and nature of the skills gap. This work links a range of research areas—such as growth accounting, skill development, higher education, and immigration—and also examines how well students are being prepared for the current and future world of work. You need to maintain clients, servers and networks, while acquiring new skills. *Foundations of Cent OS Linux: Enterprise Linux On the Cheap* covers a free, unencumbered

Linux operating system within the Red Hat lineage, but it does not assume you have a Red Hat Enterprise Linux license. Now you can learn CentOS Linux, the most powerful and popular of all Red Hat clones, keep maintaining your network at work, and become a Red Hat Certified Engineer, all just for the cost of this book. *Introduces CentOS Linux and Fedora clients as equals to Red Hat Enterprise Linux Sets up CentOS as a secure, high-performance web services back end Prepares you for the RHCE examination, but does not assume an RHEL installation* This book explores the dynamics of language changes from sociolinguistic

and historical linguistic perspectives. With in-depth case studies from all around the world, it uses diverse approaches across sociolinguistics and historical linguistics to answer questions such as: How and why do language changes begin?; how do language changes spread?; and how can they ultimately be explained? Each chapter explores a different component of language change, including typology, syntax, morphology, phonology, semantics, lexicology, discourse strategies, diachronic change, synchronic change, how the deafblind modify sign language, and the accommodation of language to

song. This book presents a comprehensive analysis of the dynamics of language change over time, simultaneously advancing current research and suggesting new directions in sociolinguistic and historical linguistic approaches.
