Environmental management is essential to the successful operation of the hospitality businesses. This book simplifies the complex issue of environmental management for both students of hospitality and industry practitioners (such as hotel managers and restaurateurs). The study explains how global environmental problems affect the hospitality industry and vice versa. It also outlines the processes that should be followed in environmental management, and the specific environmental management practices of hospitality businesses in the areas of waste management, energy and water conservation. The book provides practical illustrations, review questions, and lists of keywords and concepts in each chapter. It provides a global perspective on the study of

environmental management in the hospitality industry by drawing on success stories and previous research on the topic from across the globe. Written by a pair of experts, this completely updated introduction to endgame studies offers a series of training exercises. Three diagrams accompany each clearly worded study. Suitable for players at all levels. Coverage includes Ireland. "The Blue Book of Chess" by Howard Staunton. Published by Good Press. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. This volume describes General Electric Corporation's venture into developing

second and third generation mainframe computer systems. The General Electric Corporation (GE), which began its life as the Edison Electric Co., was long involved in electrical appliances and industrial machines. It was also a founder of the Radio Corporation of America, which eventually became one of its competitors, and developed many electrical systems in order to control different types of industrial machines. Its breakthrough into computing came with its winning bid to provide the computing systems for the Electronic Recording Method of Accounting) system developed for the Bank of America by the Stanford Research Institute. The success of this project led GE to develop the GE-200 series which was the foundation for commercial timesharing. The GE-235 was selected by Dartmouth for its Dartmouth Time Sharing System (DTSS), an innovative academic time-sharing system. BASIC was developed on the GE-235 computer system under DTSS. GE

enhanced it to develop its Mark II/III Time Sharing System, apparently the first commercial time sharing service in the world. GE developed the GE-300/400 systems for industrial process control. The GE-600 series replaced the GE-200 series and demonstrated innovation in time-sharing systems. The GE-645 was selected to host Multics, which was developed by MIT. However, GE felt that it could not compete in computing against IBM, Univac, and other mainframe competitors, so it folded its tent and sold its Computer Division to Honeywell, Inc. Nevertheless, GE will be remembered for many innovations which continue to be used in modern computing systems. This book studies the ways traditional polarized images of women have been used and challenged in the Hispanic world, especially during the 20th century and the beginning of the 21st century by writers and the media, but also in earlier time periods. The chapters analyze the image of women in specific political periods such as Francoism or the

Kirchners' administration, stereotypes of women in films in Mexico and Chile, and the representation of women in textbooks, among other topics. Contributions also show how two women writers, in the 17th and the 19th centuries, viewed the role of women in their society. Post-editing is possibly the oldest form of human-machine cooperation for translation. It has been a common practice for just about as long as operational machine translation systems have existed. Recently, however, there has been a surge of interest in post-editing among the wider user community, partly due to the increasing quality of machine translation output, but also to the availability of free, reliable software for both machine translation and post-editing. As a result, the practices and processes of the translation industry are changing in fundamental ways. This volume is a compilation of work by researchers, developers and practitioners of post-editing, presented at two recent events on post-editing: The first

Workshop on Post-editing Technology and Practice, held in conjunction with the 10th Conference of the Association for Machine Translation in the Americas, held in San Diego, in 2012; and the International Workshop on Expertise in Translation and Post-editing Research and Application, held at the Copenhagen Business School, in 2012. Islamic banking has seen rapid growth during the last two decades. This is a result of the liberalization of financial regulation, the globalization of financial markets, technological changes, product innovation, the birth of several new Islamic States, and a growing Islamic presence in the West, among other factors. New innovations have allowed economists and religious scholars to bring new products to almost all areas of banking and insurance, products which would previously have been extremely controversial. This book provides a better understanding of the Muslim community around the world of Islamic economics and its

importance, especially in these days of financial crisis. The book will also serve as a reference manual for teaching the theory and practice of Islamic banking and Islamic financial innovations around the world. Islamic finance courses at universities are highly important since Islamic financial innovations remain very limited, and additional efforts have to be made in this area. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Many books have been written about gestalt therapy. Not many have been written on the relationship between gestalt therapy and psychotherapy research. The Handbook for Theory, Research, and Practice in Gestalt Therapy is a needed bridge between these two concerns, and a timely addition to scholarly literature on gestalt therapy itself. In

2007 an international team of experienced gestalt therapists devoted themselves to create this book, and they have collaborated with one another to produce a challenging and enriching addition to the literature relevant to gestalt therapy. The book discusses the philosophy of science, the need for research specifically focused on gestalt therapy, and the critical realism and natural attitude found in both research and gestalt praxis. It provides discussions of qualitative and quantitative research, describes the methods of gestalt therapy as based in a unified theory, and illustrates the application of research in the contexts of emerging gestalt research communities. The discussion contained in this book is needed at a time when warrant for the practice of psychotherapy is increasingly sought in the empirical support available through psychotherapy research—the so called evidence-based movement—and at a time when public policy is increasingly driven by the call for "what

works." This Book of Abstracts is the main publication of the 71st Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming. American government securities); 1928-53 in 5 annual vols.: [v.1] Railroad securities (1952-53. candidates in the Social Sciences. Based on the authors' combined experience of working with both Masters and PhD students through the dissertation writing process, it offers helpful writing guidelines, from the conceptualization and problematization of the dissertation through to the literature review, methodological issues, writing up results and, finally, to the discussion, conclusions and abstract writing process. With chapters dedicated to offering guidelines, suggestions and pitfalls to watch out for, this book will assist PhD students and candidates in the fields of the various Social Sciences with exercises and pointers on successfully navigating the writing of a PhD dissertation. It takes the PhD student in the Social Sciences through the maze of writing a dissertation, and provides a step-by-step train of thought throughout the entire writing process.
