Developed by WHO and the International Committee of the Red Cross in collaboration with the International Federation for Emergency Medicine Basic Emergency Care (BEC): Approach to the acutely ill and injured is an open-access training course for frontline healthcare providers who manage acute illness and injury with limited resources. The practical skills section covers the essential time-sensitive interventions for these key acute presentations. The BEC package includes a Participant Workbook and electronic slide decks for each module. BEC integrates the guidance from WHO Emergency Triage Assessment and Treatment (ETAT) for children WHO Pocket Book of Hospital Care for Children WHO Integrated Management of Pregnancy and Childbirth and the Integrated Management of Adult/Adolescent Illness (IMAI). This manual includes specifications on copper sheet, strip, and plates; copper-beryllium alloys; phosphor bronze; seamless brass tubing; bars, rods, and forgings; copper, brass, and copper-nickel alloy wire; bearings, castings, and brazing materials; and more. Part 1, Books, Group 1, v. 22 : Nos. 1-131 (Issued April, 1925 - April, 1926) "A Cuban of our acquaintance describes Cortázar as "the best French writer in Spanish." Not only because he has the candor to set his fiction in Paris, where so many South American writers have found breathing room, but because he has a truly French feel for the miscellaneous, kitchen-sinky, birds-eye texture of dally life. In A Manual for Manuel,

you'll meet Andres, Marco, Francine, Lonstein, Lucienne, Patricio, and Susanna: a mixed group of French intellectuals and "Argentines who don't know what they're doing" in Paris. Together they make up "the Screwery," a collective that's more "pataphysical" than strictly revolutionary - involved in projects as diverse as collecting a scrapbook of newspaper clippings for Manuel (Patricio and Susanna's baby son), guerrilla theatre in department stores, counterfeiting and currency smuggling, and, grandest of all, the kidnapping of a bigwig from a multinational corporation in return for the release of captured revolutionaries in Latin America. Cortázar's narrative, as we've come to expect, is totally fractured into digressions, essays, undifferentiated dialogue, philosophical meditation, Finnegans Wake-ish pun-prose, letters, Telexes, etc. Even the book's big, wonderful action scene (this charming crew's disastrous kidnap attempt) is muffled under all the stylistic swaddling. Cortázar is often at his best here: writing about a large group of friends, making them individual yet coherent - smart people being confused together. But the book suffers by comparison with his earlier, more substantial Hopscotch; even in Rabassa's adept and sympathetic translation, Manuel seems to lack the intensity and rich ambience we look for in prime Cortázar."--Kirkus

The centrally planned economies (CPEs) of the Soviet Union and Eastern Europe have experienced severe imbalances in domestic and external markets over the past several decades. As a result, they have been chronically afflicted by problems such as excess demand, repressed inflation, deficits of commodities, queues, waiting lists, and forced savings. Economists have responded to these phenomena by developing appropriate theoretical and empirical models of CPEs. Of particular note have been the pioneering studies of Richard Portes on disequilibrium econometric models and Janos Kornai on the shortage economy. Each approach has attracted followers who have produced numerous, innovative macro- and microeconomic models of Poland, Czechoslovakia, the German Democratic Republic, Hungary, and the USSR. These models have proved to be of considerable value in the analysis of the causes, consequences and remedies of disequilibrium phenomena. Inevitably, the new research has also generated controversies both between and within the schools of shortage and disequilibrium modelling, concerning the fundamental nature of the socialist economy, theoretical concepts and definitions, the specification of models, estimation techniques, interpretation of empirical findings, and policy recommendations. Furthermore, the research effort has been energetic but incomplete, so many gaps exist in the field.
