Educating Milwaukee Jul 20 2022 "Milwaukee's story is unique in that its struggle for integration and quality education has been so closely tied to [school] choice." --from the Introduction "Educating Milwaukee: How One City's History of Segregation and Struggle Shaped Its Schools" traces the origins of the modern school choice movement, which is growing in strength throughout the United States. Author James K. Nelsen follows Milwaukee's tumultuous education history through three eras--"no choice," "forced choice," and "school choice." Nelsen details the whole story of Milwaukee's choice movement through to modern times when Milwaukee families have more schooling options than ever--charter schools, open enrollment, state-funded vouchers, neighborhood schools--and yet Milwaukee's impoverished African American students still struggle to succeed and stay in school. "Educating Milwaukee" chronicles how competing visions of equity and excellence have played out in one city's schools in the modern era, offering both a cautionary tale and a "choice" example.

Southern Liberal Journalists and the Issue of Race, 1920-1944 Jan 02 2021 Before the Civil Rights movement, southern liberal journalists played a crucial role in shaping southern thought on race and racism. John Kneebone presents a richly detailed intellectual history of southern racial liberalism between World War I and World

Fourth Annual Education Conference on Problems of Segregation and Desegregation of Public Schools Nov 24 2022

Healthy Enclaves Or Isolated Neighborhoods? Understanding the Role of Racial Residential Segregation on the Health Status of Asian Americans Implications for Research, Policy, and Practice Jan 22 2020 Racial residential segregation is known to affect the social, physical, and mental well-being of segregated minority groups in the United States. Racial residential segregation creates different exposures to a variety of resources that enhance health, including economic opportunity and access to health-promoting resources such as grocery stores and parks. Racial residential segregation also increases exposure to adverse conditions such as crime, alcohol, and toxic air pollutants. Few studies examining the relationship between segregation and health have focused on Asian Americans. However, data show that several Asian Americans groups experience considerable racial residential segregation, and are now the fastest growing population in the country. Furthermore, high-degrees of segregation have enabled political power in Black communities as a mechanism to counter the negative effects of isolation. Much less, however, is known about the effects of segregation on the political and social capital of Asian Americans and its benefits to health. Further research is needed to test the complex association between residential segregation, its mechanistic pathways, and overall health status of Asian Americans. In this three-paper dissertation, I ask 1) What are the potential mechanisms by which racial segregation is associated with self-rated physical and mental health status among Asian Americans in the United States? 2) How does social capital and

political empowerment, moderate the association of racial segregation and self-rated mental health status among Asian Americans? 3) How can building political empowerment be utilized by public health departments to address the effects of racial segregation and the health of Asian Americans? Paper #1 examines the empirical evidence of the association between residential segregation and Asian American health by critically reviewing the literature with a relational geography lens, and is one of the first papers to examine this literature. Paper #2 empirically tests the role of residential segregation on health status of AAs and the moderating roles of social capital and collective political participation. To do so, I employ multilevel modeling methods using the California Health Interview Survey (2011-12). Paper #3 studies the role of political empowerment in addressing segregation and health, and utilizes comparative multi-site case-study design, key informant interviews, participant observations, and document reviews that to review in California counties with high Asian-white residential segregation. Specifically, I document examples of collective political empowerment, and discuss the role of health practitioners--particularly those employed at local health departments--in building political empowerment as a health promotion and equity strategy.

Racial and ethnic residential segregation in the United States 1980-2000

Centromeres and Kinetochores Jul 08 2021 This book presents the latest advances concerning the regulation of chromosome segregation during cell division by means of centromeres and kinetochores. The authors cover both state-of-the-art techniques and a range of species and model systems, shedding new light on the molecular mechanisms controlling the transmission of genetic material between cell divisions and from parent to offspring. The chapters cover five major areas related to the current study of centromeres and kinetochores: 1) their genetic and epigenetic features, 2) key breakthroughs at the molecular, proteomic, imaging and biochemical level, 3) the constitutive centromere proteins, 4) the role of centromere proteins in the physical process of chromosome segregation and its careful orchestration through elaborate regulation, and 5) intersections with reproductive biology, human health and disease, as well as chromosome evolution. The book offers an informative and provocative guide for newcomers as well as those already acquainted with the field.

How Race is Made Apr 29 2023 Argues that the construction of race in southern history was not based merely on sight, but as mixed-race generations perpetuated, white southerners relied on touch, smell, sound, and taste to identify who was "white."

Urban Segregation and the Welfare State Oct 11 2021 This book offers a

uniquely international perspective on the central debates concerning the social composition of the city, the role of the welfare state, and the potential policy interventions by the state or local governments.

Conference Before the United States Commission on Civil Rights Apr 17 2022
Racial Segregation and the Origins of Apartheid in South Africa, 1919-36
Mar 04 2021 Based on extensive archival research in South Africa and drawing on the most recent scholarship, this book is an original and lucid exposition of the ideological, political and administrative origins of Apartheid. It will add substantially to the understanding of contemporary South Africa.

The Politics of "race" and Residence Jun 19 2022 This text explores the political and legislative history of racial segregation in Britain, providing a critical commentary on the development of national and local housing policy, on the operation of the major markets and institutions, and on the organization of urban management.

Sacred Mission, Worldly Ambition Jun 07 2021 Using Savannah, Georgia, as a case study, *Sacred Mission, Worldly Ambition* tells the story of the rise and decline of Black Christian Nationalism. This nationalism emerged from the experiences of segregation, as an intersection between the sacred world of religion and church and the secular world of business. The premise of Black Christian Nationalism was a belief in a dual understanding of redemption, at the same time earthly and otherworldly, and the conviction that black Christians, once delivered from psychic, spiritual, and material want, would release all of America from the suffering that prevented it from achieving its noble ideals. The study's use of local sources in Savannah, especially behind-the-scenes church records, provides a rare glimpse into church life and ritual, depicting scenes never before described. Blending history, ethnography, and Geertzian dramaturgy, it traces the evolution of black southern society from a communitarian, nationalist system of hierarchy, patriarchy, and interclass fellowship to an individualistic one that accompanied the appearance of a new black civil society. Although not a study of the civil rights movement, *Sacred Mission, Worldly Ambition* advances a bold, revisionist interpretation of black religion at the eve of the movement. It shows that the institutional primacy of the churches had to give way to a more diversified secular sphere before an overtly politicized struggle for freedom could take place. The unambiguously political movement of the 1950s and 1960s that drew on black Christianity and radiated from many black churches was possible only when the churches came to exert less control over members' quotidian lives. A Sarah Mills Hodge Fund Publication.

Racial and Ethnic Residential Segregation and Health Care Access Jul 28 2020 Does living in a racially and ethnically segregated neighborhood limit access to health care services? In my dissertation, I explore health care access among racial/ ethnic minorities in the United States and whether it is negatively or positively influenced by residential segregation. I conduct three separate analyses using nationally representative data from the National Longitudinal Study of Adolescent Health, Behavioral Risk Factor Surveillance System, Area Resource File, and U.S. Census. I employ multivariate and multilevel models to analyze contextual and individual level data. In study 1, I examine Asian segregation by neighborhood and its relationship to health care access of Asian Americans. Asian segregation has

been steadily increasing due in part to the settlement patterns of immigrants. Findings show that the relationship between Asian ethnicity and health care access was modified by the percentage of Asians in a census tract. For Koreans and other Asians, living in a predominately Asian neighborhood increased the probability of getting a yearly medical checkup. For the Chinese and Vietnamese, spatial concentration was associated with worse access to checkups. In study 2, I use multilevel models to investigate the relationship between metropolitan area segregation on individual-level health care access for African Americans. Findings show that when segregation is measured using the isolation index, it is positively associated with having a yearly medical checkup. When using the absolute centralization index, segregation is negatively related to having a yearly checkup. Therefore, the relationship between metropolitan-level segregation and health care access for African Americans depends on the measure of segregation being used. In study 3, I determine which contextual-level characteristics are associated with segregation and number of outpatient visits. Contextual-level characteristics were measured at the county and included the percent of the population unemployed, low educated, and living below poverty-level, as well as health care system variables. The most segregated counties had lowest rates of outpatient visits. For black/white segregation, this relationship remained significant despite adjusting for several county-level characteristics. In contrast, for Hispanic/white segregation and Asian/white segregation, the relationship was explained away by controlling for socioeconomic disadvantage or the number of hospitals, respectively.

Beyond Segregation Feb 03 2021 At a time when cities appear to be fragmenting mosaics of ethnic enclaves, it is reassuring to know there are still stable multicultural neighborhoods. *Beyond Segregation* offers a tour of some of America's best known multiethnic neighborhoods: Uptown in Chicago, Jackson Heights (Queens), and San Antonio-Fruitvale in Oakland. Readers will learn the history of the neighborhoods and develop an understanding of the people that reside in them, the reasons they stay, and the work it takes to maintain each neighborhood as an affordable, integrated place to live.

City of Walls Feb 15 2022 "This is an extraordinary treatment of a difficult problem. . . . Much more than a conventional comparative study, *City of Walls* is a genuinely transcultural, transnational work--the first of its kind that I have read."--George E. Marcus, author of *Ethnography Through Thick & Thin* "Caldeira's work is wonderfully ambitious--theoretically bold, ethnographically rich, historically specific. Anyone who cares about the condition and future of cities, of democracy, of human rights should read this book."--Thomas Bender, Director of the Project on Cities and Urban

Knowledges "City of Walls is a brilliant analysis of the dynamics of urban fear. The sophistication of Caldeira's arguments should stimulate new discussion of cities and urban life. Its significance goes far beyond the borders of Brazil."--Margaret Crawford, Professor of Urban Planning and Design Theory, Graduate School of Design, Harvard University "Caldeira's insight illuminates the geography of the city as well as the boundaries--or the lack of boundaries--of violence."--Paul Chevigny, author of *Edge of the Knife: Police Violence in the Americas* "An extraordinary account of violence in the city. . . . Caldeira brings to this task a rare depth of knowledge and understanding."--Saskia Sassen, author of *Globalization and Its Discontents* "An outstanding contribution to understanding authoritarian continuity under political reform. Caldeira has written a brilliant and bleak analysis on the many challenges and obstacles which government and civil society face in new democracies."--Paulo Sergio Pinheiro, Director of the Center for the Study of Violence, University of Sao Paulo and Member of the United Nations Sub-Commission for the Promotion and Protection of Human Rights

Understanding School Segregation Jan 26 2023 During recent decades, social inequalities have increased in many urban spaces in the globalized world, and education has not been immune to these tendencies. Urban segregation, migration movements and education policies themselves have produced an increasing process of school segregation between the most disadvantaged social groups and the middle classes. Exploring school segregation patterns in Argentina, Belgium, Brazil, Chile, England, France, Peru, Spain, Sweden and the USA, this volume provides an overview of the main characteristics and causes of school segregation, as well as its consequences for issues such as education inequalities, students' performance, social cohesion and intercultural contact. The book is organized in three parts, with Part 1 exploring the systemic dimensions of education inequalities that shape different patterns of school segregation, and the extent to which public policies have addressed this challenge. Part 2 focuses on the consequences of school segregation on student performance and other educational aspects, and the Part 3 explores how school segregation dynamics are shaped by market forces and privatization of education. Whilst focusing on different dimensions of school segregation, each chapter explores the magnitude, trends and consequences of school segregation, providing readers with a comprehensive overview of the phenomenon and facilitating cross-country comparisons. Moreover, the volume provides important evidence about the dynamics and characteristics of school segregation, which is key for the planning and implementation of de-segregation policies.

Fourth Annual Education Conference on Problems of Segregation and De-Segregation of Public Schools Held May 3, 4, 1962 Dec 01 2020

American Apartheid Dec 13 2021 This powerful and disturbing book clearly links persistent poverty among blacks in the United States to the unparalleled degree of deliberate segregation they experience in American cities. *American Apartheid* shows how the black ghetto was created by whites during the first half of the twentieth century in order to isolate growing urban black populations. It goes on to show that, despite the Fair Housing Act of 1968, segregation is perpetuated today through an interlocking set of individual actions, institutional practices, and governmental policies. In

some urban areas the degree of black segregation is so intense and occurs in so many dimensions simultaneously that it amounts to "hypersegregation." The authors demonstrate that this systematic segregation of African Americans leads inexorably to the creation of underclass communities during periods of economic downturn. Under conditions of extreme segregation, any increase in the overall rate of black poverty yields a marked increase in the geographic concentration of indigence and the deterioration of social and economic conditions in black communities. As ghetto residents adapt to this increasingly harsh environment under a climate of racial isolation, they evolve attitudes, behaviors, and practices that further marginalize their neighborhoods and undermine their chances of success in mainstream American society. This book is a sober challenge to those who argue that race is of declining significance in the United States today.

Patterns of Negro Segregation Mar 16 2022

Segregation and Correlated Inheritance in Marquis and Hard Federation Crosses with Factors for Yield and Quality of Spring Wheat in Montana Nov 12 2021 Pp. 67.

Segregation and Mistrust Oct 31 2020 By examining social networks in North America, Europe and Australia, this book argues segregation, not diversity reduces trust between people.

Unfair Housing Feb 21 2020 It is difficult to ignore the fact that, even as the United States becomes much more racially and ethnically diverse, our neighborhoods remain largely segregated. The 1968 Fair Housing Act and 1977 Community Reinvestment Act promised to end discrimination, yet for millions of Americans housing options remain far removed from the American Dream. Why do most neighborhoods in American cities continue to be racially divided? The problem, suggests Mara Sidney, lies with the policies themselves. She contends that to understand why discrimination persists, we need to understand the political challenges faced by advocacy groups who implement them. In *Unfair Housing* she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists. Sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination, what actions they took, and which political relationships they cultivated. As a result, local governments became less likely to include housing discrimination on their agendas, existing laws went unenforced, and racial segregation continued. A former undercover investigator for a fair housing advocacy group, Sidney takes readers into the neighborhoods of Minneapolis and Denver to show how federal housing policy actually works. She examines how these laws played out in these cities and reveals how they eroded activists' capability to force more sweeping reform in housing policy. Sidney also shows how activist groups can cultivate community resources to overcome these difficulties, looking across levels of government to analyze how national policies interact with local politics. In the first book to apply policy design theories of Anne Schneider and Helen Ingram to an empirical case, Sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations. Sidney argues forcefully that understanding the link between

national policy and local groups sheds light on our failure to reduce discrimination and segregation. As battles over fair housing continue, her book helps us understand the shape of the battlefield and the prospects for victory.

Problems of Segregation and Desegregation of Public Schools Dec 25 2022

Summary of C. Vann Woodward's The Strange Career of Jim Crow Sep 29 2020

Please note: This is a companion version & not the original book. Sample Book Insights: #1 The history of American slavery left its mark on the posterity of both slave and master, and influenced relations between them for decades after the end of the old regime. Segregation is based on these assumptions, and has its roots in the slavery period. #2 The treatment of the free Negroes was similar to that of the slaves, except that they were not slaves. They were denied full rights as citizens, and were restricted in their freedom of assembly and movement. #3 Urban life was a small aspect of the culture of the Old South, and urban slavery was a even smaller aspect of the Peculiar Institution. In a history of segregation, however, the urban experience requires special attention. #4 The urban experience in the South was typically different from the Old South, and it was a mistake to place too much emphasis on the urban experience as evidence of segregation or the opposite tendency.

Sites of Southern Memory Aug 29 2020 In southern graveyards through the first decades of the twentieth century, the Confederate South was commemorated by tombstones and memorials, in Confederate flags, and in Memorial Day speeches and burial rituals. Cemeteries spoke the language of southern memory, and identity was displayed in ritualistic form -- inscribed on tombs, in texts, and in bodily memories and messages. Katharine DuPre Lumpkin, Lillian Smith, and Pauli Murray wove sites of regional memory, particularly Confederate burial sites, into their autobiographies as a way of emphasizing how segregation divided more than just southern landscapes and people. Darlene O'Dell here considers the southern graveyard as one of three sites of memory -- the other two being the southern body and southern memoir -- upon which the region's catastrophic race relations are inscribed. O'Dell shows how Lumpkin, Smith, and Murray, all witnesses to commemorations of the Confederacy and efforts to maintain the social order of the New South, contended through their autobiographies against Lost Cause versions of southern identity. Sites of Southern Memory elucidates the ways in which these three writers joined in the dialogue on regional memory by placing the dead southern body as a site of memory within their texts. In this unique study of three women whose literary and personal lives were vitally concerned with southern race relations and the struggle for social justice, O'Dell provides a telling portrait of the troubled intellectual, literary, cultural, and social history of the American South.

Communities in Action May 06 2021 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and

decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Studies in Segregation and Desegregation Mar 24 2020 This title was first published in 2002: Over the past fifty years, numerous geographical concepts and methodologies have been developed to study urban segregation. This volume brings together an international team of scholars, practitioners and policy makers to examine the latest of these. The first section of this fascinating book sees contributors proposing innovative ideas and new conceptual models for the study of segregation in cities that undergo globalization. They assess the idea that segregation should be studied for individuals in respect to different spatial resolutions, including the study of the formation of inter-ethnic spatial networks. This is followed by an examination of questions concerning the associations among segregation, poverty and policies. The final section highlights patterns of segregation in four countries: South Africa, China, Canada and the Ruhr area, each of them representing different multicultural and transformational aspects. They also emphasize the socio-historical context in which patterns of segregation and desegregation appeared.

Amending Interstate Commerce Act (segregation of Passengers) Jan 14 2022

Coming of Age in Jim Crow DC Apr 24 2020 The fullest account to date of African American young people in a segregated city *Coming of Age in Jim Crow DC* offers a complex narrative of the everyday lives of black young people in a racially, spatially, economically, and politically restricted Washington, DC, during the 1930s. In contrast to the ways in which young people have been portrayed by researchers, policy makers, law enforcement, and the media, Paula C. Austin draws on previously unstudied archival material to present black poor and working class young people as thinkers, theorists, critics, and commentators as they reckon with the boundaries imposed on them in a Jim Crow city that was also the American emblem of equality. The narratives at the center of this book provide a different understanding of black urban life in the early twentieth century, showing that ordinary people were expert at navigating around the limitations imposed by the District of Columbia's racially segregated politics. *Coming of Age in Jim Crow DC* is a fresh take on the New Negro movement, and a vital contribution to the history of race in America.

The Strange Careers of the Jim Crow North Sep 22 2022 Did American racism originate in the liberal North? An inquiry into the system of institutionalized racism created by Northern Jim Crow Jim Crow was not a regional sickness, it was a national cancer. Even at the high point of twentieth century liberalism in the North, Jim Crow racism hid in plain sight. Perpetuated by colorblind arguments about "cultures of poverty," policies focused more on black criminality than black equality. Procedures

that diverted resources in education, housing, and jobs away from poor black people turned ghettos and prisons into social pandemics. Americans in the North made this history. They tried to unmake it, too. Liberalism, rather than lighting the way to vanquish the darkness of the Jim Crow North gave racism new and complex places to hide. The twelve original essays in this anthology unveil Jim Crow's many strange careers in the North. They accomplish two goals: first, they show how the Jim Crow North worked as a system to maintain social, economic, and political inequality in the nation's most liberal places; and second, they chronicle how activists worked to undo the legal, economic, and social inequities born of Northern Jim Crow policies, practices, and ideas. The book ultimately dispels the myth that the South was the birthplace of American racism, and presents a compelling argument that American racism actually originated in the North.

Legacy, 3-Term Mayor Apr 05 2021 He was the city's first Black American mayor (1981) since the Civil War ended (1865). During segregation and beyond, educator and former mayor Charles L. Albert Jr. championed race relations and founded Little League for Black youth on Amelia Island, located in Fernandina Beach, Florida. His three-term tenure resulted in the socio-economic improvement and aesthetic preservation of the island's character.

The Color of Law: A Forgotten History of How Our Government Segregated America Sep 10 2021 New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' "Amazing Books" of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This "powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

The Negro Motorist Green Book Aug 21 2022 The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the

public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

Remembering Jim Crow Mar 28 2023 Praised as "viscerally powerful" (Publishers Weekly), this remarkable work of oral history captures the searing experience of the Jim Crow years—enriched by memories of individual, family, and community triumphs and tragedies. In vivid, compelling accounts, men and women from all walks of life tell how their day-to-day lives were subjected to profound and unrelenting racial oppression. At the same time, *Remembering Jim Crow* is a testament to how black Southerners fought back against the system—raising children, building churches and schools, running businesses, and struggling for respect in a society that denied them the most basic rights. The result is a powerful story of individual and community survival and an important part of the American past that is crucial for us to remember. Based on interviews collected by the Behind the Veil Project at Duke University's Center for Documentary Studies, this landmark in African American oral history is now available in an affordable paperback edition and, for the first time, as an e-book with audio of the interviewees—in their own voices.

Urban Socio-Economic Segregation and Income Inequality Feb 27 2023 This open access book investigates the link between income inequality and socio-economic residential segregation in 24 large urban regions in Africa, Asia, Australia, Europe, North America, and South America. It offers a unique global overview of segregation trends based on case studies by local author teams. The book shows important global trends in segregation, and proposes a *Global Segregation Thesis*. Rising inequalities lead to rising levels of socio-economic segregation almost everywhere in the world. Levels of inequality and segregation are higher in cities in lower income countries, but the growth in inequality and segregation is faster in cities in high-income countries. This is causing convergence of segregation trends. Professionalisation of the workforce is leading to changing residential patterns. High-income workers are moving to city centres or to attractive coastal areas and gated communities, while poverty is increasingly suburbanising. As a result, the urban geography of inequality changes faster and is more pronounced than changes in segregation levels. Rising levels of inequality and segregation pose huge challenges for the future social sustainability of cities, as cities are no longer places of opportunities for all.

The Persistence of Racial Segregation in Housing Aug 09 2021

Segregation by Design Dec 21 2019 Segregation by Design draws on more than 100 years of quantitative and qualitative data from thousands of American cities to explore how local governments generate race and class segregation. Starting in the early twentieth century, cities have used their power of land use control to determine the location and availability of housing, amenities (such as parks), and negative land uses (such as garbage dumps). The result has been segregation - first within cities and more recently between them. Documenting changing patterns of segregation and their political mechanisms, Trounstein argues that city governments have pursued these policies to enhance the wealth and resources of white property owners at the expense of people of color and the poor. Contrary to leading theories of urban politics, local democracy has not functioned to represent all residents. The result is unequal access to fundamental local services - from schools, to safe neighborhoods, to clean water.

epregistry.ufpi.br
