Education and Jobs Apr 08 2021 In this famous study, selected by the New York Times Book Review as one of the most important social science books of 1971, the author argues that the familiar correlation between educational training and job performance is a myth and that the upgrading of the supply of labor is meaningless unless we reconsider the nature of the demand. A lengthy new introduction by the author extends his critique into the 1990s. Originally published by Praeger in 1970.

The Biology of Stentor Feb 04 2021 The Biology of Stentor summarizes all that has been learned about the biology of a certain group of ciliate protozoa: the stentors. Topics covered range from form and function in Stentor to behavior, fine structure, growth and division, and reorganization. Regeneration is also discussed, along with polarity, metabolism, genetics, and primordium development. This volume is comprised of 20 chapters and begins with a characterization of Stentor, with emphasis on its particular advantages in addressing general problems of biology. The reader is then introduced to form and function in Stentor, particularly *S. coeruleus*. The following chapters focus on the behavior (food selection, swimming, response to light, etc.) of stentors and the fine points of structure in terms of which this behavior is to be explained and which demonstrate the highly complex and precise achievements of morphogenesis. The remaining chapters explore growth and division in Stentor as well as the course of reorganization and regeneration; development of the oral primordium and how it is activated and inhibited; rate of regeneration in relation to the polar axis; fusion masses of whole stentors; and reconstitution in disarranged stentors. Various species of Stentor are also described, together with the techniques used to study them. The final chapter deals with hypotheses concerning the morphogenesis of ciliates. This book will be of interest to students and practitioners of biology and physiology.

Schöne Geisel Sep 13 2021 »Sie gehört jetzt dir.« Mit diesen vier Worten macht mir mein Chef ein Geschenk: Die Erlaubnis, die Frau zu entführen und zu behalten, die ich seit Jahren begehrte. Seit wir Teenager waren, habe ich mein Verlangen nach Sofia verleugnet. Obwohl ihr Vater an der Leitung unseres Kokainimperiums beteiligt ist, hat Caesar Hernandez sie sorgfältig vor den brutalen Realitäten unserer Welt abgeschottet. Sie war immer viel zu unschuldig und rein gewesen, als dass ich sie aus ihrem verzauberten Leben in mein verdorbenes hätte ziehen wollen. Caesar hat sich jedoch entschieden, meinen skrupellosen Chef Adrian Rodriguez zu verraten. Will er nicht, dass seine geliebte Tochter zu Schaden kommt, wird er seine Loyalität erneut unter Beweis stellen müssen. Jetzt habe ich sie, und er ist sich meiner sadistischen Neigungen sehr wohl bewusst. Ich habe versucht, sie davor zu bewahren, kann aber meine wilde Natur nicht bekämpfen, wenn sich Sofia in meinem Haus und in meiner Gewalt befindet. Sie wird lernen, mir bedingungslos zu gehorchen, wenn sie sich etwas ihrer Freiheit zurückerobern will. Sofia wird mein braves Mädchen sein und mir all die finsternen Fantasien erfüllen, die ich jahrelang unterdrückt habe. Ich werde alles tun, was nötig ist, um meine schöne Geisel zu behalten. Sollte jemand versuchen, sie mir zu stehlen, werde ich einen Krieg anzetteln, um meinen wertvollsten Besitz zu schützen. Sofia ist mein, und ich werde sie niemals gehen lassen.

Chronicles from the Future Aug 01 2020 In 1921, Paul Amadeus Dienach, a Swiss-Austrian teacher with fragile health, falls into a one-year-long coma. During this time, his consciousness slides into the future and enters the body of another man in 3906 A.D. When Dienach awakens from his coma, he finds himself back in 1922. Knowing that he doesn't have much time left, he writes a diary, recording whatever he could remember from his amazing experience: the mankind's history in the forthcoming centuries, from the nightmare of overpopulation and World Wars up until the world-changing globalisation, the radical new administration system, the colony on Mars and the next human evolutionary stage. Without any close friends and relatives to entrust, he doesn't say a word to anyone out of fear of being branded a lunatic. Before he dies, he hands his diary to his favourite student, George Papachatzis, later prominent Professor of Law and Rector of Panteion University of Greece. The diary circulates as hidden knowledge amongst high ranking masons in the lodges of Athens. In 1972, professor Papachatzis, despite an intense dispute, decides to publish Dienach's diary in Greek. Paul Dienach was not an author, poet, or professional writer. Rather, he was an ordinary man who kept a journal, never with the expectation that it would be published. This unique and controversial book, a universal legacy, is now carefully edited, translated and available to everyone. This is the history of our future! We deliver it to you."

Hydroponics Jan 06 2021 Hydroponics simply means working water ("hydro" means "water" and "ponos" signifies "labor"). Many distinct civilizations have used hydroponic growing techniques: hanging gardens of Babylon, the floating gardens of the Aztecs of Mexico and people of the Chinese are cases of 'Hydroponic' culture. Hydroponics is of course a new way of growing plants. Hydroponic gardening can be VERY complex, with sensors and computers controlling everything from watering cycles to nutrient power and the total amount of light the plants get. On the flip side, hydroponics may also be incredibly straightforward, a hand watered bucket of sand using one plant can also be a way of hydroponic gardening. Many hobby-oriented hydroponics systems are somewhere between the two extremes mentioned previously. The "average" home hydroponic system generally contains a couple of basic components: a growing tray, a reservoir, an easy timer controlled submersible pump to water the plants and an air pump and air stone to oxygenate the nutrient solution. Obviously, light (either artificial or natural) can also be required. Now, much of the food on the dinner table is homegrown. There's a certain satisfaction in knowing that the food on your dinner table is grown using your skills. You don't require a massive budget to start, and if you do, you'll quickly taste and feel the advantages. As a result of the success of hydroponics, we've got plenty of herbs, salad fruits and ingredients. It might be that you're just beginning. You might even have a little flat, as I formerly had. Ethnobotany Jul 24 2022 Ethnoecology has blossomed in recent years into an important science because of the realization that the vast body of knowledge contained in both indigenous and folk cultures is being rapidly lost as natural ecosystems and cultures are being destroyed by the encroachment of development. Ethnobotany and ethnozoology both began largely with direct observations about the ways in which people used plants and animals and consisted mainly of the compilation of lists. Recently, these subjects have adopted a much more scientific and quantitative methodology and have studied the ways in which people manage their environment and, as a consequence, have used a much more ecological approach. This manual of ethnobotanical methodology will become an essential tool for all ethnobiologists and ethnoecologists. It fills a significant gap in the literature and I only wish it had been available some years previously so that I could have given it to many of my students. I shall certainly recommend it to any future students who are interested in ethnoecology. I particularly like the sympathetic approach to local peoples which pervades this book. It is one which encourages the ethnobotanical work by both the local people themselves and by academically trained researchers. A study of this book will avoid many of the arrogant approaches of the past and encourage a fair deal for any group which is being studied. This manual promotes both the involvement of local people and the return to them of knowledge which has been studied by outsiders.

It is a comprehensive tool, leading to an in-depth understanding of work, its results, and its improvement in a unique organization context. It is a humane tool, viewing workers in light of their full potential and capacity for positive growth. With FJA, workers and managers can work more constructively together in a wholesome and productive work relationship.

Test Plan Apr 01 2023 This WIPP Bin-Scale CH TRU Waste Test program described herein will provide relevant composition and kinetic rate data on gas generation and consumption resulting from TRU waste degradation, as impacted by synergistic interactions due to multiple degradation modes, waste form preparation, long-term repository environmental effects, engineered barrier materials, and, possibly, engineered modifications to be developed. Similar data on waste-brine leachate compositions and potentially hazardous volatile organic compounds released by the wastes will also be provided. The quantitative data output from these tests and associated technical expertise are required by the WIPP Performance Assessment (PA) program studies, and for the scientific benefit of the overall WIPP project. This Test Plan describes the necessary scientific and technical aspects, justifications, and rationale for successfully initiating and conducting the WIPP Bin-Scale CH TRU Waste Test program. This Test Plan is the controlling scientific design definition and overall requirements document for this WIPP in situ test, as defined by Sandia National Laboratories (SNL), scientific advisor to the US Department of Energy, WIPP Project Office (DOE/WPO). 55 refs., 16 figs., 19 tabs.

The Land and People of County Meath, 1750-1850 Feb 25 2020 The 1750s marked the beginning of a period of dramatic growth in the Irish population, when the Irish economy became increasingly shaped by the demands of the Industrial Revolution in Britain. This monograph traces how these great changes were played out on the rolling plains of Co. Meath. Long characterized as a rich county dominated by strong farmers involved in the fattening of beef cattle, the picture that emerges is a much more complex one. Making use of a wide range of sources, including estate records and the surviving manuscript census of 1821 for the Navan baronies, this book explores the relative position of the different classes in rural society over the period. It suggests that by the 1840s a large proportion of the population had been marginalized by changes in the economy, by the decline in the domestic linen industry and by the growing demand for land. The Great Famine is set in this context and portrayed as the denouement of Meath's landless labourers and cottiers. The geography of the thousands of mud cabins that disappeared from the landscape in these years is explored as a lost, and largely forgotten, generation, that succumbed

to the workhouse, death and emigration.

DISKO (Second Edition) Feb 28 2023 The second edition of DISKO, a photography book about Lithuanian village discos by Andrew Miksys. "The discos of Lithuania were once Soviet offices, detention centers, weapons storage, rare Lithuanian mushroom-packing plants... who knows? ...Andrew's photographs capture a generation born to bewilderment: the disko kids still carry the past in their eyes and hard-to-maintain indifference, but they are the creatures of a very brief moment in time, one that will never ever exist again except in these pictures. Miksys has caught a fleeting world that emanates death and hope in the pulses of ephemeral disco lights." - Andrei Codrescu For ten years Andrew Miksys traveled the back roads of Lithuania photographing teenagers in village discos (2000-2010). Most of these discos are located in Soviet-era culture houses where Miksys would sometimes find discarded Lenin paintings, old Soviet movie posters, gas masks, and other remnants of the Soviet Union. He became fascinated by all this debris of a dead empire and the teenagers who visited the clubs. It seemed like a perfect backdrop to make a series of photographs about young people in Lithuania, a crumbling past, and the uncertain future of a new generation all together in one room.
