**Gastrointestinal Imaging: Case Review Series E-Book** Feb 15 2022 Gastrointestinal Imaging: Case Review, by Vincent Low, MD, FRANZCR, tests your ability to interpret a wide range of images seen in practice. The completely revised edition of this medical reference book in the popular Case Review Series features 200 cases organized by difficulty, making it ideal for quick reference and easy board review! Utilizes case studies organized into "Opening Round," "Fair Game," and "Challenge" sections, so you can Test yourself at varying difficulty levels. Uses a format similar to the American Board of Radiology's oral exam, and case studies similar to those found on exams for realistic exam preparation. More than 350 high-quality, state-of-the-art images present clinical situations as encountered in the field. Includes the most recent knowledge from the literature in gastrointestinal imaging to keep your skills

current. Helps you distinguish among diseases and disorders with similar sonographic presentations with an increased emphasis on differential diagnosis. Groups cases by topic for more efficient, targeted review. Incorporates page references to Halpert: Gastrointestinal Imaging: The Requisites, 2nd Edition.

**Musculoskeletal Imaging** Dec 25 2022 This volume uses 200 case studies to challenge your knowledge of a full range of topics in musculoskeletal imaging. Whether you are preparing for the radiology board exams, recertifying, or looking to hone your diagnostic abilities, this book will help you read and interpret all imaging modalities used for the musculoskeletal system.  
**Breast Imaging Essentials** Jul 28 2020 This book covers all the essential aspects of breast imaging necessary for the preparation of MMed, MD, FRCR and FRANZCR exams. The main focus is on mammogram and breast ultrasound along with basics of breast MRI and breast interventions. With the increasing popularity of these qualifying exams among radiology residents in Asia, Great Britain as well as Australia and dearth of relevant resources on the topic, this book will serve as a valuable resource for the

candidates. The book is also aligned with preparations required for the FRCPC (Canada) and the American Board of Radiology. The book is divided into two sections - first section includes chapters on basics of breast imaging along with a chapter on emerging technologies while the second section includes 50 exam-relevant cases covering imaging findings utilizing appropriate BI-RADS lexicon, possible differentials, next recommended investigation and appropriate management in accordance with American College of Radiology lexicon, BI-RADS system and MRI correlation, whenever available. Readers also get familiar with the indications for breast MRI. The book is written by experts in breast imaging with relevant teaching experience. Written by an experts with strong teaching experience, this book is not only suitable for exams but is also useful for practicing breast and non-breast radiologists as well as breast care clinicians, keen to learn fundamentals of breast imaging.

**Imaging the Story** Mar 24 2020 "Tell all the Truth but tell it slant." (Emily Dickinson) This course follows the contours of the salvation story through the lens of the arts. Putting visual art and poetry in conversation with the Bible, it seeks to engage the imagination. Rather than analyzing the narrative, the reader is invited to behold it and respond to it through "making"--either verbally or visually. At times, the church has treated the imagination like an embarrassing relative. Yet the Bible is image-rich, drawing widely on the imagination, and we are each made in the image of the creator God. It is time to bring the imagination out of the corner! "For we are God's handiwork, created in Christ Jesus to do good works, which God prepared in advance for us to do." (Eph 2:10 NIV) Whether following it as a group or reading it alone, this course book will appeal to anyone with an interest in the salvation story and the arts. It is particularly for those who feel permission is needed to pick up a paintbrush--or any other

creative medium--just for the love of it.

*Abdominal Imaging* Apr 17 2022 Master the critical imaging content you need to know with this newly consolidated title in the popular Case Review series. *Abdominal Imaging* offers a highly illustrated, case-based preparation for board review to help residents and recertifying radiologists succeed on exams, demonstrate a clinical understanding of gastrointestinal and genitourinary imaging, and improve imaging accuracy and interpretation. Cases include both common and difficult-to-diagnose disorders including gallbladder diseases, pancreatitis and pancreatic masses, staging and identification of gynecologic malignancies, fluoroscopy findings in GI and GU diseases, and much more. Presents more than 160 high-yield case studies organized by level of difficulty, helping you build your knowledge and confidence in stages. Includes more than 650 multiple-choice questions, answers, and rationales that mimic the format of certification exams. Uses short, easily digestible chapters covering the full range of abdominal imaging for efficient, effective learning and exam preparation. Features 700+ high-quality, full-color images spanning the GI and GU systems and pertinent patient cases reflecting current abdominal radiology practice. Images include fluoroscopy and plain films, computed tomography, and magnetic resonance imaging, with

coverage of key areas such as prostate MRI and rectal MRI, CT enterography, liver CT and MRI, and renal masses on CT and MRI. Consolidates topics covered in *Gastrointestinal Imaging: Case Review* and *Genitourinary Imaging: Case Review* into a single, convenient resource.

**Chest Imaging Cases** Jan 14 2022 *Chest Imaging Cases* thoroughly encompasses the field of thoracic radiology through 137 cases covering common and challenging radiologic and clinical issues. The cases are divided into categories important for board examinations and clinical practice: diagnoses that should be made on radiography, trachea, esophagus, chest wall, thoracic outlet, congenital lesions, mediastinal lesions, pleura, diaphragm, pulmonary masses, diffuse lung disease, pulmonary vascular disease, thoracic trauma, and post-surgical complications. Using a problem and solution format, each case features high-quality images, practical differential diagnoses, approaches to daily practice, management pearls and suggested readings. Concise discussions keep cases brief and informative, allowing for efficient learning and interpretation. *Chest Imaging Cases* is the essential resource for honing diagnostic skills in thoracic radiology for students, physicians-in-training and practitioners.

*Case Review Sep 10 2021* Part of the popular new Case Review series, this volume focuses on brain imaging from a multimodality perspective and is perfectly customized to meet the self-testing needs of those preparing for exams or to serve as a way for general radiologists to sharpen their skills in this subspecialty area. Two hundred unknown brain cases with 400 images are succinctly presented in random order with questions, answers, commentary, references, and cross-references to the relevant REQUISITES volume. Differential diagnoses and pertinent radiological findings will be emphasized, but relevant clinical points also will be covered. Cases will be divided by difficulty level, with a division between more common cases and the more unusual and challenging cases. \* Features an at-a-glance review of brain cases that prepares residents, fellows, and practicing radiologists studying for exams or wishing to spruce up this subspecialty area. \* Mimics official exam formats which allows for self-testing, subsequent learning, preparation and confidence-building to succeed in exam settings and practice settings. \* Organizes cases randomly and divides them into three overall categories, so the reader has the opportunity to test him/herself at different degrees

of difficulty. \* Provides an outstanding review of the entire subspecialty of neuroradiology when combined with the recently published Head and Neck volume and the soon to be published volume on the Spine. \* Complements and references the Neuroradiology: THE REQUISITES volume to provide the most comprehensive review for the exams. THE REQUISITES covers the essentials of the subspecialty and the CASE REVIEW allows you to test yourself on those essentials. \* Includes approximately 420 state-of-the-art images which complement the text and provide a clear picture of what exam takers can expect. \* Affordable, manageable, practical 8 1/2 x 11 size with space for note-taking in the text. \* Features a consistent format with the same features: case presented as unknown with four questions, followed by answers to questions, detailed commentary, latest references in the literature, cross-reference to THE REQUISITES volume, and space for note-taking.

*Spine Imaging May 18 2022* Spine Imaging, a title in the popular Case Review Series, helps you effectively prepare for certification, recertification, and practice in spine imaging with case studies that test your knowledge of all essential topics. This medical reference book will show you how to make confident, final diagnoses through accurate pattern recognition, clinical correlation, and differential diagnosis. Prepare effectively by reviewing 160 spine imaging

cases, organized by level of difficulty, that mimic the new format of radiology certification and recertification exams. Every case includes at least 3 images and 4 multiple-choice review questions, along with rationales that explain why each answer is correct or incorrect. Ensure your knowledge is up to date with the aid of new and updated spinal imaging case studies covering modalities such as Spinal MRA imaging, SWI, CINE CSF flow, MR myelography and peripheral nerve imaging. New cases include discal cyst, polymyalgia rheumatica, Gaucher disease, pigmented villonodular synovitis, ventriculus terminalis cyst, and much more.

Radiology Case Review Series: Breast Imaging Mar 16 2022 More than 200 cases offer a rigorous review of breast imaging

Brain Imaging: Case Review Series E-Book Oct 11 2021 This volume in the best-selling "Case Review" series uses hundreds of case studies to challenge your knowledge of a full range of topics in brain imaging. With 170 brand new cases, new coverage of MRA, CTA, MR spectroscopy and multi-detectors and over 600 brilliant images, this is your ideal concise, economical, and user-friendly tool for self assessment in this specialty! Utilizes case studies organized into "Opening Round," "Fair Game," and "Challenge" sections, so you can test yourself at varying difficulty levels. Provides at-a-glance review/self-testing of brain imaging cases ideal for

preparing for the boards in brain imaging, the CAQ exam for neuroradiology or for the general radiologist ready for re-certification. Mimics the official exam formats and daily practice environment by giving you cases/images as unknowns with three to four questions; then, on the flip side of the page, diagnosis, answers to the questions, additional commentary, and references to the corresponding volume in Elsevier's popular Requisites Series. Includes 600 state of the art images to effectively compliment and support the text and provide a clear picture of what you can expect, both in test-taking and in practice. Uses randomly organized cases so you can test yourself without the aid of logical organization by anatomy or disease type. Includes 170 new cases and over 50 new diagnoses so you can keep pace with the latest developments. Includes a greater emphasis on differential diagnosis. Adds coverage of MRA, CTA, MR spectroscopy and multi-detectors to keep you completely current. Provides all new images for existing entities. Adds cutting-edge coverage of neuro-imaging including spectroscopy, CTA, MRA, Functional imaging, tractography, perfusion and diffusion.

### **Gastrointestinal Imaging**

Apr 24 2020 Gastrointestinal Imaging presents a comprehensive review of gastrointestinal pathologies commonly encountered by practicing radiologists and residents in training. Chapters are organized by organ system

and include the Pharynx and Esophagus, Stomach, Small Bowel, Appendix, Colon, Anorectum, Liver, Gallbladder, Bile Ducts, Pancreas, Spleen, Peritoneum, Mesentery, and Abdominal Wall, and a chapter on multisystem disorders. Part of the Rotations in Radiology series, this book offers a guided approach to imaging diagnosis with examples of all imaging modalities complimented by the basics of interpretation and technique and the nuances necessary to arrive at the best diagnosis. Each pathology is covered with a targeted discussion that reviews the definition, clinical features, anatomy and physiology, imaging techniques, differential diagnosis, clinical issues, key points, and further reading. This organization is ideal for trainees' use during specific rotations and for exam review, or as a quick refresher for the established gastrointestinal imager.

*Genitourinary Imaging* Feb 03 2021 This title provides an excellent case selection for sharpening diagnostic skills in this challenging subspecialty area. Emphasis is on differential diagnoses and pertinent radiological findings, but the relevant clinical points are also covered. This second edition contains numerous new images (more than 400 total images) as well as an addition of fifty cases. It is cross-referenced to GU RADIOLOGY: The Requisites, 2e. Volume in the Case Review series, covering brain imaging, targeted towards residents, fellows and practicing

Radiologists Mimics official exam formats and daily practice environment with a pedagogically anchored format that introduces cases/images as unknowns with three to four questions; then, on the flip side of the page, diagnosis, answers to the questions, additional commentary, references and cross-references to The Requisites volume are supplied in logical succession; blank space is available for note taking. Cases are randomly organized and then divided into three overall categories reflecting three different levels of difficulty. Over 400 state of the art images Can be read cover to cover in a short period of time All existing cases revised Approximately 50 new cases (including a greater focus on MR and Gyn) Addition of a new co-editor (Fielding will supply the 50 new cases) New images for approx. 75% of existing entities Greater emphasis on DDx Greater emphasis on patient treatment All references updated

**Radiology Case Review Series: Gastrointestinal Imaging** Sep 29 2020 200 interactive brain imaging cases deliver the best board review possible! Effective 2-page presentation for each case Cases organized and coded by difficulty level Full-color design Part of the acclaimed McGraw-Hill's Radiology Case Review Series, this unique resource challenges readers to look at a group of images, determine the diagnosis, answer related questions, and gauge their knowledge by reviewing the correct answer. It all adds up to the best review of brain

imaging available - one that's ideal for certification or recertification, or as an incomparable clinical refresher. Distinguished by an effective 2-page design and a full-color presentation, each book in this series is filled with cases, annotated images, questions and answers, pearls, and relevant literature references that will effectively prepare readers for virtually any exam on the subject. This comprehensive coverage spans everything from basic principles through the latest diagnostic imaging techniques and equipment and technology.

**Brain Imaging: Case Review Series** Apr 05 2021 Brain Imaging: Case Review Series is a presentation of numerous different cases, covering major diseases radiologists may encounter on a daily basis. Presented in exam format, each case firstly provides the clinical history and radiological images for the reader to make a diagnosis. The review then provides the correct diagnosis and additional commentary on the case. Cases are based upon varying difficulty levels and are followed by key learning points and diagnostic pointers. A comprehensive list of references is also included.

**Cardiac Imaging Cases** Aug 09 2021 This easy-to-use, clinically oriented learning guide presents 115 unique cases that cover the scope of cardiac imaging, including congenital, ischemic, myocardial, valvular, and pericardial heart disease, as well as postintervention complications. Given the standard format of problem and solution, each case is

structured for effective review and learning for both the resident-in-training and the experienced clinician. Cases are categorized by section: the first encompasses a brief review of basic anatomy, and subsequent sections are divided by disease category. Featuring over 440 images and accompanied by brief yet informative discussions, **Cardiac Imaging Cases** is the ideal resource and reference guide for anyone in the field of cardiovascular radiology. Also available as an app for iPad on the Apple iTunes store.

**Imaging of Bone and Soft Tissue Tumors** Oct 31 2020

This volume presents a selection of clinical cases with the emphasis on tumors of bone and soft tissues. Case for case, the reader is supplied with information and invited to suggest a diagnosis. In each case the patient's history is briefly reviewed and characteristic images are reproduced. Special importance is attached to lucid analysis, basic considerations and systematic image interpretation. Each case is histologically verified, and the definitive diagnosis is betrayed on the last page. Case presentations closes with a concise summary of the important clinical data relating to the entity concerned. This authoritative yet eminently readable book is a practical guide to the analysis of the kind of complex orthopedic cases with which orthopedists and radiologists should become familiar.

**Vascular and Interventional Imaging: Case Review Series**

**E-Book** Jun 19 2022 Increase your knowledge and improve your image interpretation skills using the proven and popular Case Review approach! Drs. Wael E. Saad, Minhaj S. Khaja, and Suresh Vedantham have updated this new edition to include nearly 200 clinically relevant cases with associated images, multiple-choice questions, answers, and rationales - all organized by level of difficulty and designed to reinforce your understanding of the essential principles needed to interpret a wide range of vascular and interventional images. Study effectively with content that addresses contemporary medical practice emphasizing physics, clinical evaluation, and treatment following The Joint Commission and the Accreditation Council for Graduate Medical Education. View cases that reflect contemporary practice, thanks to new, multi-modality imaging, including color images and 3D reconstructions. Stay up to date with recent innovations in vascular and interventional radiology with a more diverse case selection, updated procedural techniques and inventory, and new and updated references from reputable sources. Get fresh perspectives from nearly 200 updated or new cases reflecting the most recent changes in vascular and interventional radiology, including portal hypertension, aortic disease, interventional oncology, peripheral arterial disease, and complex venous disease.

[Duke Radiology Case Review](#)

Jan 26 2023 Residents, fellows and practicing radiologists who are preparing for certification exams (the current ABR Part II oral, the future ABR Core and Certifying, CAQ and MOC) will find the new edition of this case-based review book an indispensable tool for success. Duke Radiology Case Review has long been considered one of the standards in board review, and is a well-known adjunct to the popular and well-attended board review course given by the prestigious Department of Radiology at Duke University. Close to 300 case presentations are structured to align with the way residents are taught to work through patient cases. Divided by body region and including chapters on interventional radiology and nuclear medicine, each case offers a clinical history, relevant images, and bulleted points describing the differential diagnosis. This is followed by the actual diagnosis and key clinical and radiologic facts about the diagnosis and suggested readings. This edition includes a new chapter on cardiac imaging.

*Imaging Physics Case Review E-Book* Sep 22 2022 Master the critical physics content you need to know with this new title in the popular Case Review series. Imaging Physics Case Review offers a highly illustrated, case-based preparation for board review to help residents and recertifying radiologists succeed on exams and demonstrate a clinical understanding of physics, patient safety, and

improvement of imaging accuracy and interpretation. Presents 150 high-yield case studies organized by level of difficulty, with multiple-choice questions, answers, and rationales that mimic the format of certification exams. Uses short, easily digestible chapters and high-quality illustrations for efficient, effective learning and exam preparation. Discusses current advances in all modalities, ensuring that your study is up-to-date and clinically useful. Covers today's key physics topics including radiation safety and methods to prevent patient harm; how to reduce artifacts; basics of radiation doses including dose reduction strategies; cardiac CT physics; advanced ultrasound techniques; and how to optimize image quality using physics principles. Enhanced eBook version included with purchase, which allows you to access all of the text, figures, and references from the book on a variety of devices
